1
Push the top button to count up. Count up to 9999 times.

2
Twist the side reset knob clockwise to jump forward.
Continue to twist clockwise until the counter reaches 0000.

KEEP IT FOREVER

WARRANTY

We design with intention by looking at every detail across the lifespan of the product. We do everything we can to create the highest quality products built with longevity in mind.

That's why Nudge is built to last and has a lifetime warranty. If there's something wrong, like a manufacturing defect or part failure, let us know and we'll make it right. If, for whatever reason, you want to dispose of your Nudge, please get in touch with us so we can find a way to keep it out of landfills.

For full details on our lifetime warranty please head to nanuelectrics.com/FAQ. If you have any questions or issues, please shoot us a note at hello@nanuelectrics.com.

CONTINUE FOR CARE INSTRUCTIONS →

NANU

KEEP IT GOING

To clean, wipe down the glass dome and brass body with a lint free cloth. (Nudge comes with a handy microfiber bag just for this).

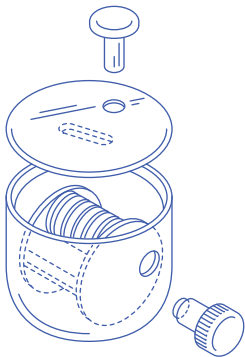

For a closer clean, use a slightly dampened cloth with mild soap and water.

The brass is treated with a protective coating to keep it looking beautiful for a long time. The coating is anti-fingerprint and anti-tarnish. Please do not attempt to buff Nudge as this could damage the coating.

To prolong the life of the coating, please keep your Nudge clean and dry. Keep liquids and moisture away from any openings on Nudge.

Do not spray cleaners directly onto Nudge, and avoid cleaning solutions that contain bleach or abrasives.

Do not use scouring pads or steel wool as these will scratch Nudge's glass and brass.
