

Bolster Staff Health and Your Bottom Line

From small towns to the metropolitan area, access to leading fitness solutions for optimal health and well-being is how municipalities create a thriving work culture among general support staff and first-responder support where high fitness levels are a must.

To meet today's ever-evolving workplace dynamics, studies show that physical and mental wellness options are key to improving retention, lowering absenteeism, boosting productivity, and creating a happier, more synergized workforce. And where every dollar matters, investing in support staff health through access to fitness and exercise bolsters a municipalities bottom line.

The Treadmill Factory is dedicated to being the most comprehensive resource for fitness and health solutions for over 30 years. Plus, we've been expertly assisting municipalities of all sizes to achieve their health and wellness goals by offering a wide range of highly customizable premier brand equipment, accessories, and configurations to meet their needs.

Facility Planning & Design for Success

When you're partners with the Treadmill Factory's Facility Planning & Design experts, we not only include premium brands with expanded functionality and performance, but we'll also go deeper with a complete Needs Assessment.

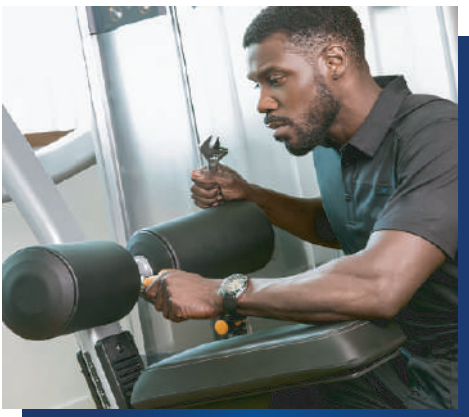

As a new build or existing space, your stage of planning or concept development is a tailored experience, eliminating obstacles to concept and design. We combine space and equipment that meets your unique facility floor plan requirements and specifications, including user demographics and budgets. We then bring your vision to life using 2D and 3D rendering for cutting-edge design that highlights the accessibility and functionality of your space.

Installation & Project Management

From coordinating flooring to ensuring your equipment package is properly installed, our installation professionals will also have your layout spatially configured for aesthetics as well as optimal functionality and usage. Plus, we can provide training for your staff to ensure proper use and care for machines and accessories to maximize safety and longevity.

Service

The Treadmill Factory initially began its operations by repairing treadmills for other stores and end users in 1988. Today, we can proudly say that our company has one of the most advanced service departments in all of North America providing customers with access to knowledgeable technicians in addition to offering the best service possible. Our nearly 80,000 sq.ft facility in Markham, Ontario allows us to:

- » Respond to service calls within a 24-48hr period
- » Provide senior technicians managed by the VP of Commercial Sales
- » Stocked parts to provide faster turn over time
- » Repair electronic boards in house to help save huge repair costs
