

Golf-Fit Training Solutions to Level Up Your Game

In earlier times it was assumed that golf weaknesses were from breaks in form and incorrect technique, not physical limitations. However, modern-day golfers and trainers alike – beginner to pro – understand that one cannot push the body through 18 holes of golf with consistent and perfect form unless one improves upon fitness levels. And that means an investment in being golf-fit can be your guaranteed “Ace.”

With over 30 years in the game, the Treadmill Factory knows a Club’s success relies greatly on quality, dependable equipment and accessories that are user-friendly for its members and easy to manage for staff, so equipment downtime is kept to a minimum. Our team of fitness professionals are focused on helping your Club create a stand-out member experience. You’ll have access to cardio, strength, and functional training equipment and accessories from every category of fitness imaginable that are sleek, display state-of-the-art features, and can be customized to your space.

At the Treadmill Factory, we lend our vast knowledge and expertise to advise you on the perfect equipment needed to provide a functional training room for members of all ages and activity levels. Our team can help you design and build a beautiful space for year-round use, which means improved member retention, increased revenues, and a healthy ROI.

Facility Planning & Design for Success

When your Club partners with the Treadmill Factory's Facility Planning & Design experts, we not only advise on various training resources needed for member performance, but we'll also go deeper with a complete Needs Assessment.

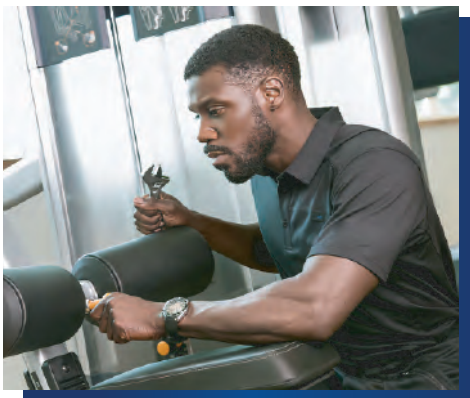

As a new build or existing space, your stage of planning or concept development is a tailored experience, eliminating obstacles to concept and design. We combine space and equipment that meets your unique facility floor plan requirements and specifications, including user demographics and budgets. We then bring your vision to life using 2D and 3D rendering for cutting-edge design that highlights accessibility and functionality of your space.

Installation & Project Management

From coordinating flooring to ensuring your equipment package is properly installed, our installation professionals will also have your layout spatially configured for aesthetics as well as optimal functionality and usage. Plus, we can provide training for your staff to ensure proper use and care for machines and accessories to maximize safety and longevity.

Service

The Treadmill Factory initially began its operations by repairing treadmills for other stores and end users in 1988. Today, we can proudly say that our company has one of the most advanced service departments in all of North America providing customers with access to knowledgeable technicians in addition to offering the best service possible. Our nearly 80,000 sq.ft facility in Markham, Ontario allows us to:

- » Respond to service calls within a 24-48hr period
- » Provide senior technicians managed by the VP of Commercial Sales
- » Stocked parts to provide faster turn over time
- » Repair electronic boards in house to help save huge repair costs
