

ENHANCE GUEST EXPERIENCE, BOOST OCCUPANCY RATES

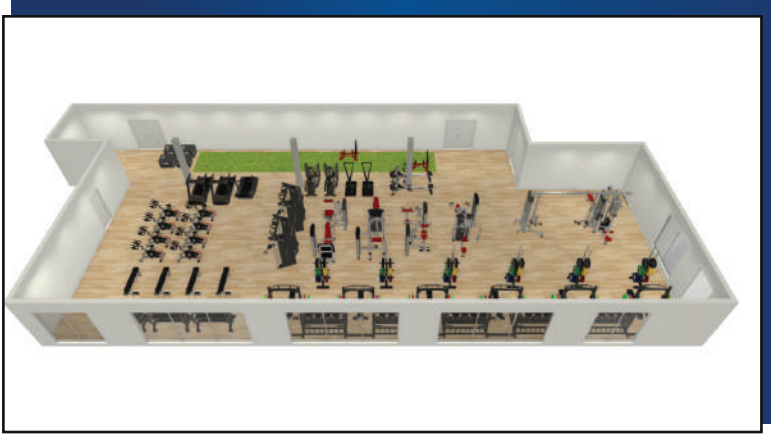

Fitness and wellness lifestyle enthusiasts are always looking for fitness options no matter where they are in their travels. And whether it's for leisure or a business trip, giving your guests their favorite equipment in a space that adapts to your hotel and their needs can increase your room occupancy rates and revPAR.

With over 30 years serving Canadians, Treadmill

Factory can help your hotel create a unique fitness experience in a single gym space and/or any unoccupied rooms, providing guests with a variety of fitness and wellbeing options. We have premier brand cardio, strength, and functional training equipment and accessories from every category of fitness imaginable. To enhance user experience, you'll have access to current fitness trends like digital state-of-the-art features that allow for on-demand training and tracking with integrated Smart technology like Touch Screen and Wi-Fi-enabled equipment.

At the Treadmill Factory, we lend our vast knowledge and expertise to advise you on the perfect equipment needed to provide a functional training room for users of all ages and fitness needs. Our team can help you design an aesthetically pleasing space that helps guests stay inspired. Plus, you can add to your guest's unique experience by offering an easily accessible in-room fitness option by equipping the room with light-weight dumbbells, resistance bands, TRX, exercise ball, Yoga blocks, an exercise bike, and other accessories.

Facility Planning & Design for Success

Vacationers and business travelers expect their hotel to have appropriate fitness offerings and will even select their hotel specifically based on these criteria. When your hotel partners with the Treadmill Factory's Facility Planning & Design experts, we not only advise on various training resources needed for a stand-out guest experience, but we'll also go deeper with a complete Needs Assessment.

As a new build or existing space, your stage of planning or concept development is a tailored experience, eliminating obstacles to concept and design. We combine space and equipment that meets your unique facility floor plan requirements and specifications, including user demographics and budgets. We then bring your vision to life using 2D and 3D rendering for cutting-edge design that highlights accessibility and functionality of your space.

Installation & Project Management

From coordinating flooring to ensuring your equipment package is properly installed, our installation professionals will also have your layout spatially configured for aesthetics as well as optimal functionality and usage. Plus, we can provide training for your staff to ensure proper use and care for machines and accessories to maximize safety and longevity.

Service

The Treadmill Factory initially began its operations by repairing treadmills for other stores and end users in 1988. Today, we can proudly say that our company has one of the most advanced service departments in all of North America providing customers with access to knowledgeable technicians in addition to offering the best service possible. Our nearly 80,000 sq.ft facility in Markham, Ontario allows us to:

- » Respond to service calls within a 24-48hr period
- » Provide senior technicians managed by the VP of Commercial Sales
- » Stocked parts to provide faster turn over time
- » Repair electronic boards in house to help save huge repair costs
