

TACTICAL TRAINING SOLUTIONS FOR CANADA'S BEST

Our Canadian Forces never rest as they work tirelessly to protect our country and secure our freedoms. Preparing recruits mentally and physically for daily training as well as unforgiving battle conditions requires that they must undergo rigorous Canadian military tactical training protocols – utilizing fitness training equipment that can stand up to anything.

While the new recruits undergo fitness assessments as part of the recruitment process and

for personnel in service, all recruits need access to more ways to build strength and conditioning. The Treadmill Factory is dedicated to delivering high-end, durable, heavy equipment they can rely on with brands like Assault fitness, XM Fitness, and more. From tactical vests to rucksacks and beyond, our premier lineup of military-grade training equipment delivers the results to execute tasks that are directly linked to true-to-life physical challenges faced on military operations.

With over 30 years in the game, the Treadmill Factory's focus is on providing our Canadian military with quality, versatile cardio, strength, and functional training equipment and accessories. From every category of fitness imaginable, our heavy-duty fitness lineup can stand up to 24/7 use and can be customized to any space. Plus, we're able to ship coast-to-coast, we have inexpensive shipping and installation, we prioritize Canadian Forces over any other order, and offer discounts for ALL Canadian Forces facilities and its members.

Facility Planning & Design for Success

When your Military branch partners with the Treadmill Factory's Facility Planning & Design experts, we not only advise on various training resources needed for performance, but we'll also go deeper with a complete Needs Assessment.

As a new build or existing space, your stage of planning or concept development is a tailored experience, eliminating obstacles to concept and design. We combine space and equipment that meets your unique facility floor plan requirements and specifications, including user demographics and budgets. We then bring your vision to life using 2D and 3D rendering for cutting-edge design that highlights accessibility and functionality of your space.

Installation & Project Management

From coordinating flooring to ensuring your equipment package is properly installed, our installation professionals will also have your layout spatially configured for aesthetics as well as optimal functionality and usage. Plus, we can provide training for your staff to ensure proper use and care for machines and accessories to maximize safety and longevity.

Service

The Treadmill Factory initially began its operations by repairing treadmills for other stores and end users in 1988. Today, we can proudly say that our company has one of the most advanced service departments in all of North America providing customers with access to knowledgeable technicians in addition to offering the best service possible. Our nearly 80,000 sq.ft facility in Markham, Ontario allows us to:

- » Respond to service calls within a 24-48hr period
- » Provide senior technicians managed by the VP of Commercial Sales
- » Stocked parts to provide faster turn over time
- » Repair electronic boards in house to help save huge repair costs
