

## LEADING WELLNESS SOLUTIONS FOR SUSTAINABLE PATIENT RESULTS

Long gone are the days of cookie-cutter therapy with a basic printout of client homework exercises prescribed. Today's progressive, results-oriented practitioners are applying a "physiofitness" approach – fitness and wellness tools for a whole-body approach to heal your current aches and pains and to improve your everyday functional performance.

The Treadmill factory has been supplying industry-leading equipment and accessories to

Clinics and Practices across the country for decades – to help your clients thrive and recover quickly. Our reliability, product expertise, and a wide array of options for practitioners and clinic managers have made us a go-to destination for facilities like yours. You'll have access to cardio, strength, and functional training equipment and accessories from every category of fitness that are sleek, display state-of-the-art features, and can be customized to your space.

Our massive warehouse is always fully stocked, and you can expect quick, dependable delivery and service, helping you as practitioners and clinic managers to offer our expert services confidently and reliably to the clients under your care. Our commercial-grade solutions will minimize service disruptions to your clients and help make managing your facility much easier.

## Facility Planning & Design for Success

When your Clinic partners with the Treadmill Factory's Facility Planning & Design experts, we not only advise on various training and wellness resources needed to meet client needs, but we'll also go deeper with a complete Needs Assessment.

As a new build or existing space, your stage of planning or concept development is a tailored experience, eliminating obstacles to concept and design. We combine space and equipment that meets your unique facility floor plan requirements and specifications, including user demographics and budgets. We then bring your vision to life using 2D and 3D rendering for cutting-edge design that highlights accessibility and functionality of your space.

## Installation & Project Management

From coordinating flooring to ensuring your equipment package is properly installed, our installation professionals will also have your layout spatially configured for aesthetics as well as optimal functionality and usage. Plus, we can provide training for your staff to ensure proper use and care for machines and accessories to maximize safety and longevity.

## Service

The Treadmill Factory initially began its operations by repairing treadmills for other stores and end users in 1988. Today, we can proudly say that our company has one of the most advanced service departments in all of North America providing customers with access to knowledgeable technicians in addition to offering the best service possible. Our nearly 80,000 sq.ft facility in Markham, Ontario allows us to:

- » Respond to service calls within a 24-48hr period
- » Provide senior technicians managed by the VP of Commercial Sales
- » Stocked parts to provide faster turn over time
- » Repair electronic boards in house to help save huge repair costs
