

BUILD YOUR PT STUDIO INTO A NEXT-LEVEL THRIVING BUSINESS

With fitness returning to its purest form, how a PT Studio should look, feel, and what it should offer has no limits. Fitness enthusiasts of all demographics, fitness levels, and interests are bypassing traditional large gyms opting for something, fresh, exciting, and challenging – with easier payment options and contract commitments.

At the treadmill Factory we'll help you create a diverse training environment that can deliver every type of fitness and wellness you had in mind for your clients. From basic 1-on-1 fitness and wellness to strength and conditioning, Group Fitness, MMA, Boxing, and more, our massive warehouse of industry-leading equipment and accessories has been supplying Personal Training Studios across the country for decades.

You pick your niche, and the Fitness Factory team of professionals will help you build your dream business with tailored equipment and accessories. We'll ensure your studio can offer your clients the best that our industry has to offer. Already a thriving PT Studio that needs more? We have premier brand selection of cardio, strength, and functional training equipment and accessories from every category of fitness imaginable that display state-of-the-art features, and can be customized to any space.

Facility Planning & Design for Success

When your PT Studio partners with the Treadmill Factory's Facility Planning & Design experts, we not only advise on various training and wellness resources needed to meet client goals, but we'll also go deeper with a complete Needs Assessment.

As a new build or existing space, your stage of planning or concept development is a tailored experience, eliminating obstacles to concept and design. We combine space and equipment that meets your unique facility floor plan requirements and specifications, including user demographics and budgets. We then bring your vision to life using 2D and 3D rendering for cutting-edge design that highlights accessibility and functionality of your space.

Installation & Project Management

From coordinating flooring to ensuring your equipment package is properly installed, our installation professionals will also have your layout spatially configured for aesthetics as well as optimal functionality and usage. Plus, we can provide training for your staff to ensure proper use and care for machines and accessories to maximize safety and longevity.

Service

The Treadmill Factory initially began its operations by repairing treadmills for other stores and end users in 1988. Today, we can proudly say that our company has one of the most advanced service departments in all of North America providing customers with access to knowledgeable technicians in addition to offering the best service possible. Our nearly 80,000 sq.ft facility in Markham, Ontario allows us to:

- » Respond to service calls within a 24-48hr period
- » Provide senior technicians managed by the VP of Commercial Sales
- » Stocked parts to provide faster turn over time
- » Repair electronic boards in house to help save huge repair costs
