Optional attachments and weights sold separately

STBR500 Commercial T-Bar Row

The full-commercial rated Pro Clubline STBR500 T-Bar Row has a premium, oversized diamond-plated footplate that keeps the user solid and stable throughout their workouts. The superior design differs from competitor's T-Bar row platforms by eliminating the bar/rod in the middle of the platform giving users a superior range of motion and workout freedom. The STBR500 T-Bar Row features a wide knurled bar with 16" of knurl on each side. This machine also features an eyelet allowing full customization of the machine with any cable handle for near-unmatched workout versatility. The STBR500 T-Bar Row is constructed with the commercial facility in mind and features a smooth rotation point at the back of the machine for consistent and precise returns on each movement.

Weight: 163 lbs.

Dimensions: 79"L x 42.5"W x 18.75"H
