Rearrange and try different styles until you're satisfied with the result. View it in 3-D and print with all the measurements, just like an architect. See how much it will cost and get the list of all products. Once you're happy with your plan, save it straight onto the IKEA server so that you can pick it up at your nearest IKEA store. Then get final planning advice and assistance from us before purchasing the products you need to make your virtual room a reality. Please note that IKEA does not allow personal storage devices like a USB memory stick or CD to be brought to the IKEA store due to security reasons. If you'd like to use more than one planner to customise a room, you will need to download each separate planner individually. This will create a single IKEA home planner to use with the furniture of your choice. Click here to see how it works.
