DECEMBER 2017 QUARTERLY REPORT

Parkway Minerals ("**Parkway**" or "**The Company**") is pleased to provide an update of activities for the December quarter.

HIGHLIGHTS

Lake Barlee Project

- Heritage Survey approvals received, Programme of Works approvals in progress
- First drill programme planned to commence in March quarter 2018

Strategic Investment

• PWN owns 7.32 Million Lithium Australia shares

Davenport Resources (19.2 Million shares held, 26%)

• Large, high grade historic resources reported for recently purchased Ebeleben and Mulhausen mining licences.

Corporate

• Controlled Placement Agreement established after period end

LAKE BARLEE PROJECT

Parkway has a number of exploration licence applications covering Lake Barlee, north-east of Southern Cross in Western Australia (Figure 1). During the quarter 3 applications were granted and the project now consists of 4 ELs and 8 ELAs.

A geophysical survey of the Lake Barlee bed was carried out in the period. A passive seismic survey was completed over targetted choke points within the lake, as shown in Figure 2. The results of the survey are shown in figure 3. The seismic responses are interepreted to show a main channel close to the north bank of the lake, fed by tributaries coming in from the south. The main channel is estimated to extend for over 8 km and have widths of up to 1600 metres. The full announcement was released on 10 November 2017.

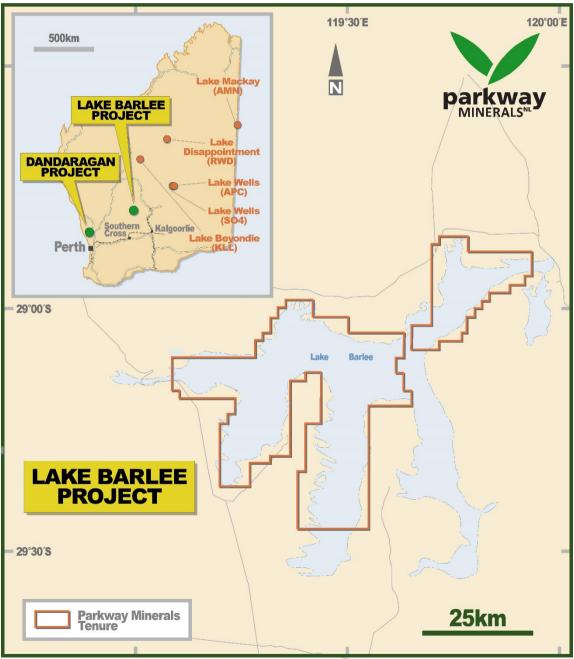

Figure 1 Lake Barlee Project area.

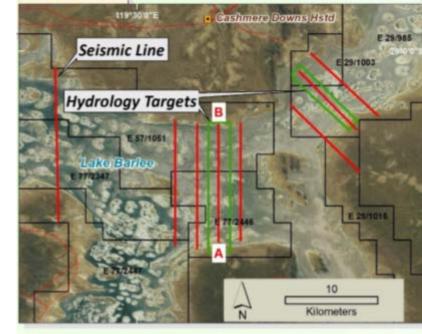

Figure 2 Lake Barlee passive seismic survey lines

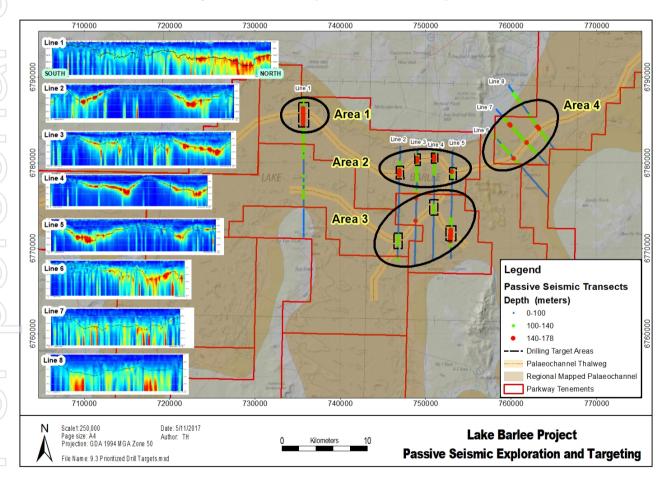

Figure 3 Lake Barlee : Seismic responses, interpreted palaeochannels and drill targets

A heritage survey was completed in early December and approval of proposed Programme of Work is expected within January. Fieldwork has commenced on site, with the objective of commencing drilling as soon as practicable.

DANDARAGAN TROUGH PROJECT

Parkway has continued to advance the Dinner Hill Potash and Phosphate Deposit, located some 200km north of Perth in Western Australia, (Figure 4). Dinner Hill forms part of the larger Dandaragan Trough Project (**DTP**), where Parkway holds over 1,000km² of exploration tenure. Sedimentary rocks within the trough contain glauconite, a potash rich mica, and phosphate nodules. The objective is to produce phosphate and potash fertilisers and a range of valuable by-products from the phosphate and glauconite present within the sediments of the Dandaragan Trough. The Dinner Hill Project covers some +332 km² within the DTP.

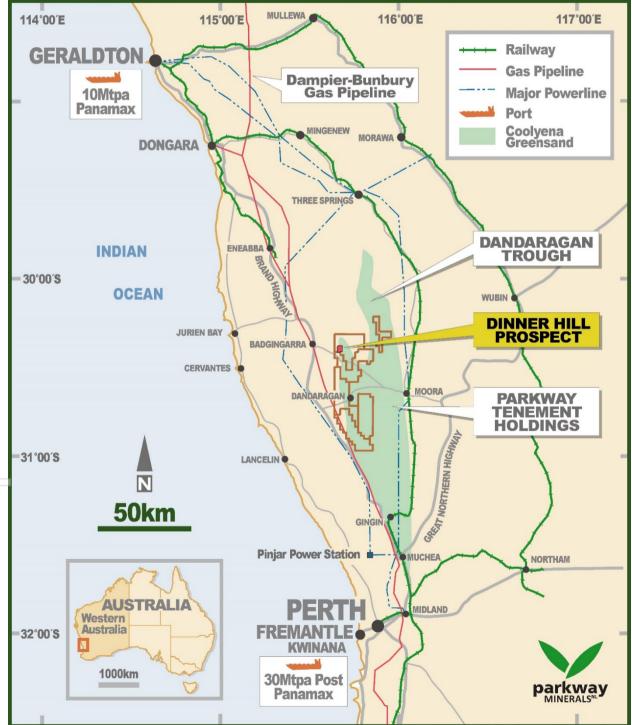

Figure 4: Location plan, Dandaragan Trough Project

The DTP has unique advantages of excellent connectivity to transport facilities, infrastructure and proximity to local and regional markets. It is located within an easy drive from Perth, and is less than 200km from two major bulk export ports, Kwinana and Geraldton. It is well situated in relation to major project infrastructure, and significant local and regional markets for its products.

Dinner Hill Resource Statement

The resources for the Dinner Hill project were recalculated during September 2017 and reported to ASX on 26 September. The resources cover an area of approximately 52 km^{2,} and are shown in table 1.

DINNER HILL RESOURCE

Table1 Dinner Hill Deposit: Resource Summary

Resource	Category	Tonnes (Mt)	P₂O₅ (%)	K₂O (%)
Phosphate	Indicated	160	2.45	(/*)
•	Inferred	470	1.7

	Total	280		2.6
Total Potash Resources	Indicated	210		3.8
	Inferred	700		3.8
	Totals	910		3.8

Note: Totals may differ from sum of individual items due to rounding

DAVENPORT RESOURCES

Parkway owns 19.2 million shares of Davenport Resources (**DAV**), which holds exploration licences in the South Harz region of Germany (Figure 5). The South Harz has a long history of potash mining, dating back to the late 1890s. Extensive exploration work and R&D was carried out in the period from the 1960s to the 1980s. This work confirmed that substantial potash deposits still remain in this region

Davenport has acquired 3 Mining Licences from BVVG, a federal government department responsible for disposing assets of the former GDR. Refer DAV ASX announcment 25 October 2017. These licences, Mülhausen-Nohra, Ebeleben and Omhgebirge, have been extensively drilled over a number of campaigns (Figure 6) and the data has been well preserved .A significant historic resource from previous drilling on Ebeleben was announced by Davenport 15 November 2017. Further work, reviewing existing drilling data, is in progress.

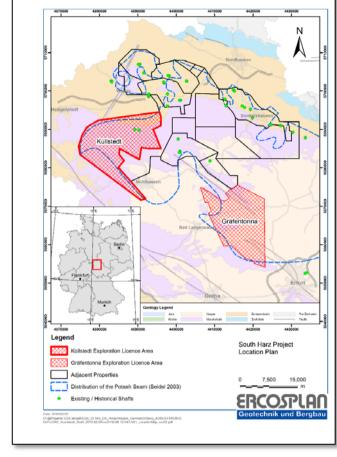

Figure 5: South Harz Project Location

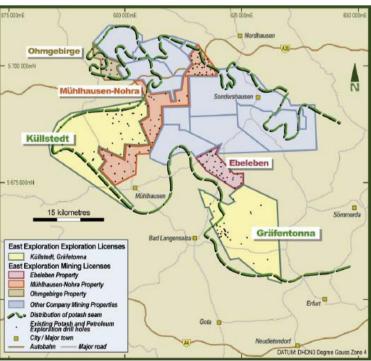

Figure 6: Location of additional mining licences

Dr Chris Gilchrist, currently a Non-executive director of Davenport will take over as Managing Director on 1 March 2018. Dr Gilchrist has extensive operating and development experience in European and African potash projects, his skills will add considerable expertise to the executive team.

SHAREHOLDINGS

Parkway owns shares in the following ASX listed Companies:

- Lithium Australia (ASX LIT) 7.32 M
- Davenport (ASX:DAV) 19.2 M,
- Davenport (ASX:DAV) 17.9 M milestone 1 shares (refer PWN announcement 18 August 2015)
- Davenport (ASX:DAV) 17.9 M milestone 2 shares (refer PWN announcement 18 August 2015)

CORPORATE

Parkway monitors activities and opportunities that may be relevant to the Company's objectives. This may include expanding or changing the scope of existing projects or engaging with third parties on other projects. If a proposal advances, details would be announced in accordance with the Company's continuous disclosure obligations.

ANNOUNCEMENTS

ACTIVITIES SUBSEQUENT TO END OF QUARTER

CORPORATE

During January 2018 Parkway entered into a Controlled Placement Agreement (**CPA**) with Acuity Capital. The CPA will provide PWN with up to \$3 million of standby equity capital over the coming 3 years. PWN retains full control of all aspects of the placement process: having sole discretion as to whether or not to utilize the CPA, the quantum of issued shares the minimum issue price of shares and the timing of each placement tranche, if any. There are no requirements for PWN to utilize the CPA and PWN may terminate the CPA at any time, without cost or penalty. Acuity Capital and the CPA do not place any restrictions, at any time, on PWN raising capital through other methods. If PWN utilizes the CPA, PWN is able to set a floor price (at its sole discretion) and the final issue price will be calculated as the greater of that floor price, set by PWN, and a 10% discount to a Volume weighted Average Price (VWAP) over a period of PWN's choosing (at the sole discretion of PWN).

As collateral for the CPA, PWN has agreed to place 24 million shares from its LR7.1 capacity at nil consideration to Acuity Capital (collateral shares). PWN may, at any time, cancel the CPA and buy back the Collateral Shares for nil consideration (subject to shareholder approval). Refer to PWN ASX release 18 January 2018.

CASH ON HAND

At 31 December 2017, \$2.1 million cash was available.

About Parkway Minerals

Parkway Minerals (ASX: PWN) is a company focused on developing fertiliser feedstock projects. The Company holds 1,900km² of exploration licenses and applications over Lake Barlee, where it is exploring a sulphate of potash project from the brines in the lake, north of Southern Cross in Western Australia.

The Company has a major land holding over one of the world's largest known glauconite deposits, with exploration licenses and applications covering an area of over 1,050km² in the greensand deposits of the Dandaragan Trough, in Western Australia's Perth Basin. The area is prospective for both phosphate and potash. Previous exploration indicates glauconite sediments are widespread for more than 150km along strike and 30km in width. A pre-feasibility study is in progress for stage 1, production of phosphate fertilisers. The project is well situated in relation to infrastructure, with close access to rail, power and gas. A successful commercial outcome will allow the Company to become a major contributor to the potash and phosphate markets at a time of heightened regional demand.

The Company owns 19.25M shares (26%) of Davenport Resources, which owns a potash exploration project in the South Harz region of Thuringia, in Central Germany. The region has been a potash producing area for over 100 years.

Competent Person's Statement:

Dandaragan Trough Project

The production targets and other information in this announcement that relate to Mineral Resources, are based on, and fairly represent, the Mineral Resource and supporting documentation extracted from the reports which have been prepared by a Competent Person in compliance with the JORC Code (2012) and released to ASX by the Company on 26 September 2017 and 28 September 2017. Parkway Minerals confirms that it is not aware of any new information or data that materially affect the information included in the original announcements. All material assumptions and technical parameters underpinning the Mineral Resource estimate in those previous ASX releases continue to apply and have not materially changed. The Company further confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement.

- 1. The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity that wishes to disclose additional information is encouraged to do so, in a note or notes included in or attached to this report.
- 2. If this quarterly report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, AASB 6: Exploration for and Evaluation of Mineral Resources and AASB 107: Statement of Cash Flows apply to this report. If this quarterly report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
- 3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
