Weights and measures

Nominal Capacity	1.000 l	275 gal US
Brimful Capacity	1.060 l	280.027 gal US
Length	1,200 mm	47.240 in
Width	1,000 mm	39.370 in
Height with pallet	1,160 mm	45.670 in
Total weight approx.	55.311 kg	121.940 lbs US

Pallet

Pallet type	Steel-framepallet, zined
Opening height	min. 90mm, 4-way entry

Outer container

Grid	Steel, galvanized
Bottom plate	Steel, galvanized
Corner protector	white
Label plate	large - 6 field, with Schütz-Ticket
additional label plate	back side - standard

Inner container

Rectangular blow molded tank of high density polyethylene
 Container PE-HD, natural

Filling opening

Screw cap DN150 / 6", PE-HD, green
 O-ring gasket TPE

Plug	without Plug
Discharge opening	
Outlet valve	integr.butterfly-valve DN50/2"
Case	PE-HD
Connection thread	metric
Flap gasket / Ball gasket	PP
Handle color	green, Handle protection
Screw cap	PE-HD
Screw cap gasket	PE, foamed
Screw cap color	green
Outlet nozzle	PE-HD, packed

Features

UN-Marking

UN_31HA1/Y/MM YY/L/SNCH/17B001/SCHÜTZ#/4056/2037/1060L/55KG/100KPA

Directive

Food safety according to FDA-Standard, declaration of conformity

Production

According to the FDA process description (PDF Annexe 1)

Heavy metals

Concentration level of heavy metals (Pb, Cd, Cr VI and Hg) in packaging does not exceed 100 ppm

Delivery

Ready for filling. The customer or filler is responsible for testing the material compatibility of the filling material with the packaging

User information:

By implementing and continually improving extensive preventive programmes, SCHÜTZ strives towards minimising the potential contamination risk for filling material in line with the current state of the art and in accordance with recognised and applicable quality and system standards. In industrial manufacturing, however, the possibility of particles arising cannot be fundamentally and entirely eliminated. Specifically for plastic and steel packaging, unavoidable friction during opening and closing as well as static charging of the packaging contribute to the development of particles and/or the possibility of particles being attracted. Such particles can then also invariably penetrate the packaging interior. With the goal of minimising the risk of particle formation and transmission into packaging, users are recommended – particularly during further processing – to keep packaging closed wherever possible and to keep the number of opening and closing procedures as low as possible. In the case of sensitive filling materials or filling material applications (e.g. for food/pharmaceutical products, paint or electro-chemicals), it is also recommended that the filling material is filtered on removal or prior to further processing.

Material of components that come into contact with the filling good:

- HDPE, food-safe
- Food-safe seals and dyes
- Free of silicones

Product:

- FDA label + design
- Certificate of conformity
- migration tests/certificates
- Halal & kosher certification

Process:

Overarching measures

- Annual standard QM audit conforming to ISO 9001 regulations and performed by the certification company LRQA
- Annual internal audit planning to ensure a functioning QM system
- Annual duty to produce evidence of conformity with the appropriate EU legislation
- Duty to inform about changes in the materials used
- Traceability system and recall of materials in conformity with the legal minimum requirements (raw material supplier and customer are known)
- AEO + C-TPAT
- Hygiene regulations for employees in conformity with the SCHÜTZ FDA standard
- (clean gloves, clothing and hairnets)
- Components (screw caps, valves) packed and stored prior to assembly
- Visual final inspection

+

- Other accessories individually packed and separately stored*
- Protective cover for transport*
- Customer-specific delivery instructions*
