

# Stainless Steel Cluster Housing

The Stainless Steel Cluster Filter Housings offer a wide variety of applications for the water treatment industry. Simple to install, easy to maintain, and having no water wastage makes these housings an excellent choice for large scale, heavy duty filtration requirements. The Cluster Housings hold 7 cartridges each and come in 3 sizes, 500mm (20"), 750mm (30") and 1000mm (40") providing flow rates from 200Lpm to 420Lpm.

The housings are available in 304 and 316 Stainless Steel. They are designed to accept 64mm (2½") O.D. standard Double Open End (DOE) cartridges making them compatible with a wide range of cartridges adding to their versatility. The housing includes a top vent/pressure gauge port on the cap and raw water and filtered water drains located on either side of the sump.

## Features and Benefits

- Price Competitive
- Ideal for High Temperature
- Polished Exterior Finish
- Easy to Install & Maintain
- Robust Stainless Steel Construction
- Accepts a Wide Range of DOE Cartridges
- Pressure Gauge Port in Cap (1/4")  
(2 x Pressure gauges included)

## General Specifications

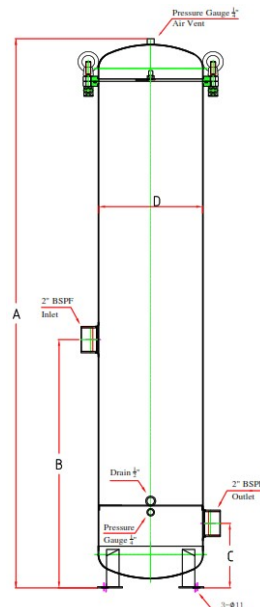

- Port Size : 20" 1½" BSPT - FI  
30" & 40" 2" BSPT - FI
- Temperature Ranges: 4.4°C - 140°C  
(40°F - 285°F)
- Operating Pressure: 1034kPa (150 psi)  
(Maximum)
- Recommended Flow Rate: 20" 210 Lpm  
(Maximum)  
30" 315 Lpm  
40" 420 Lpm

**NOTE:** Flow rate will vary depending on type of filter cartridge installed. (Filter Cartridge NOT included)

**Protect against Pressure Surge and Water Hammer.**

**Warning:**

For drinking water applications, do not use water that is microbiologically unsafe or of unknown quality without adequate disinfection.
