

NEWCO PROFILER

DIGITAL HOT & COLD BEVERAGE SYSTEM

Features

4 in 1 - Hot and cold preparation of coffee and tea with optional cold water bypass.

Recipe Creation – Take complete control of the individual brewing parameters for each recipe to ensure perfectly prepared beverages.

Intuitive Touch Screen – Color display for programming and operation with touch interface.

Passcode Protection – Manufacturer, user, and service functions are protected from tampering by unauthorized personnel.

USB Programmability – Recipes, graphics screens, and firmware upgrades can be loaded using the USB port.

Brew Selection – Control the number of active brew recipes with selectable icons to ensure the correct recipe is chosen for each preparation.

Direct Access Programming – Allows user to quickly find specific programs.

Energy Saving – Fully customizable modes for conserving energy during periods of non-use.

The innovative Profiler offers a 4 in 1 brewing experience. Coffee and tea, cold or hot, are available and brewed with precision and ease. Water quantity, time, temperature, and even cold water dilution are all quickly adjusted through the intuitive touch interface to ensure exact recipes.

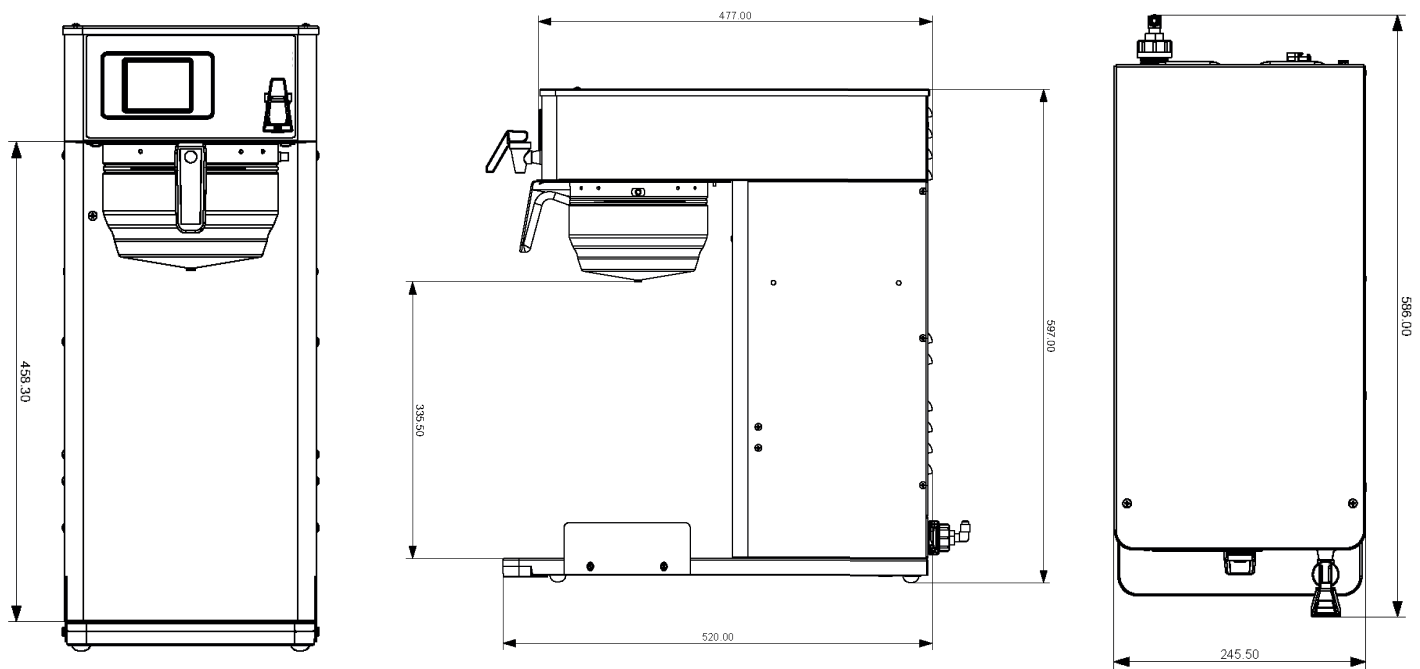

Water Delivery

Water Delivery – Control of all water delivery parameters including:

- pre-infusion volume
- pre-infusion pause time
- concentrate volume
- concentrate delivery time and pulsing
- concentrate drip time
- by-pass temperature
- by-pass volume
- by-pass delay time
- By-pass may be delivered before, during or after the brew concentrate.

*Note: By-pass features require optional by-pass valve.

Dimensions
