Applications	About
<p>The GrowTronics T5LED Happy Horticulture line offers a balanced spectrum white light that uses a combination of intense warm white and cool white to deliver balanced light for strong and steady growth of indoor plants. Designed to overcome the limitations of traditional fluorescent and allow you to achieve excellent results with a single grow light spectrum. The Happy Horticulture line is a budget friendly option for those just starting out or upgrading from T5 fluorescent.</p>	<ul style="list-style-type: none"> ◆ >50,000 hour life ◆ Ideal for top canopy and intercanopy lighting ◆ Surface or hanging mount ◆ -30° to 40°C operating temperature ◆ Beam angle 120° ◆ Waterproof IP65 ◆ Connect up to 7 bars in series ◆ 3 year warranty

Spectrums

T5LED 6400+2700K

For the hobbyist grower looking to get started the Happy Horticulture 6400K/2700K combo spectrum is a balanced light spectrum ideally suited for full cycle growth for all types of plants such as herbs, leafy greens, seedling and succulents.
