

ROLLGLISS®
HEAVY DUTY RESCUE POLE

HIGH STRENGTH PICK-OFF RESCUE POLE.

THE ULTIMATE IN FALL PROTECTION

PRODUCT SHEET

ROLLGLISS® HEAVY DUTY RESCUE POLE

HIGH STRENGTH PICK-OFF RESCUE POLE.

DBI-SALA's Rollgliss® Heavy Duty Rescue Pole is a high strength alternative for use with the Rollgliss® R250 Rescue Kit, or a variety of rescue kits to safely reach and rescue and injured worker.

ROLLGLISS® HEAVY DUTY RESCUE POLE

DBI-SALA's Rollgliss® Heavy Duty Rescue Pole has been designed as a high strength alternative for use with the Rollgliss® R250 Rescue Kit, or with a variety of peer rescue kits/systems during pick-off rescue operations. The heavy duty construction and non conductive elements of the pole make it ideal for use around high and low voltage work areas to safely reach and rescue an injured worker.

The poles telescopic function allows it to extend from 1.5 to 3.8 metres in length allowing the rescuer(s) to remove a person from danger without putting themselves at risk by descending down to them. Smooth turn lock functionality allows the pole to easily extend, retract and safely lock off in sections to suit your rescue scenario.

Fitted with a sunrise end fitting, the specially designed adaptor holds the rescue hook in place, enabling rescuers to hook onto the suspended person's fall arrest D-ring during rescue operations. The base of the pole is fitted with a safety cord with karabiner attachment to secure the pole to the structure or rescuer, preventing it from being accidentally dropped during rescue activity.

The pole is lightweight and portable and comes complete with its own carry bag for ease of transport, use and storage.

FEATURES

- Designed as a heavy duty alternative rescue/pick-off pole to be used with the Rollgliss® R250 rescue kit
- Sunrise end fitting with specially designed adaptor holds the rescue hook in place enabling easy attachment of the lifeline to the suspended worker
- Extends from 1.5 to 3.8 metres for added reach and flexibility
- Integral safety cord with karabiner attachment secures the rescue pole to the structure for added safety
- Turn lock functionality for easy extension, retraction and lock off
- Lightweight and portable, complete with carry bag for ease of use, transport and storage

Specifications:

Part Number: 8900031. **Pole:** Light weight epoxy resin. **End Cap:** Plastic. **Fitting:** Aluminium sunrise fitting. **Safety Cord:** 3mm plaited nylon. **Karabiner:** 8mm karabiner. **Length:** 1.5m to 3.8m. **Weight (approx):** 1.9kg. **Carry Bag:** PVC inner and nylon outer, 1.5m in length. **Compatibility:** Designed for use with DBI-SALA approved components or systems, or as recommended by a competent person. **Special Instructions/Conditions of Use:** Reading user instruction label located on pole prior to use is essential.
