Arya, Independent Advisor, to work with you on this issue. Office mix was discontinued in 2018 (Anyway, it was not made available on Mac platform even then). It can't be downloaded now. Many features from Office mix were incorporated in Office 365. Mac version may not have all features of Windows version. Download Office Mix for Windows to add voice, video, and digital ink to your PowerPoint presentations. It gives you Office 2013 on PCs and the same license allows you to install Office 2008 on Mac computers as part of the 5 allowed installations. The Mac version will be upgraded 'for free' and automatically when the new Mac version is released. It currently costs US\$100 per year. For Office applications on Mac, the versions below 16.16.x are Office 2016, and the versions above 16.17 are Office 2019. Additionally, we don't recommend mix up two versions of Office applications on your Mac.

For any Mac running macOS 10.10 or newer

Office Mix is an add-in for PowerPoint that provides extra tools that enhance how you deliver and share your presentation. In other words, Office Mix lets you be there even when you are not physically delivering your presentation. Mix enables you to record your delivery to perfection, and it saves all the interactivity. The end results closely mimic self-delivered content.

Within Office Mix (or Mix), you can add interactive quizzes and polls. You can also insert audio clips, videos, screen captures, and screenshots. Then you can use your annotations, time them, and record as a video, and share with the world.

Note that Mix output doesn't need PowerPoint for playback. Such content can be published online to Office 365 or exported to a video. You can see some samples of Mix content and also download some videos on the Office Mix site.

Some Mix content is very well designed and delivered, such as this sample Mix of Bill Gates' talk, **Are poor countries doomed to stay poor?**
