Manufacturing Peripherals
&
Bespoke OEM Products

Since 1981

Education Technologies

In 1981, Ceratech began to manufacture and distribute products within the UK, Europe and the United States before opening a branch office in Paris. The main product portfolio covered EPOS, Industrial and Office peripherals.

Over the following years, Ceratech developed and registered the brand name Accuratus to cater for consumer products whilst launching a number of products into the retail sector. In the 1990's, Ceratech developed a range of products for the OEM channel and continues to partner with some.

Accuratus Contour - USB Sculptured Ergonomic Split Key Keyboard

ERGONOMIC

The NEW Contour keyboard from Accuratus has been designed to provide a comfortable and dynamic hand position with the ergonomic reverse tilt, achievable using the fold out feet at the front of the keyboard, split keys, and sculpted design. The natural relaxed placement of the hands on the keyboard and the wide wrist rest are ideal for those who want to type in comfort with a neutral wrist position.

Pair the Contour with optional Accuratus 100 numeric keypad (KYBAC100-00BLK), and Accuratus Upright 2 Mouse (MOU-UPRIGHT2-BLK) for the ultimate ergonomic desktop set.

KYB-CONTOUR-UBK

- USB wired 'plug and play' connection.
- Black case and keys (other colours made on special request).
- Sculptured and contoured design, shaped to fit the natural position of your hands and finger tips.
- Split key keyboard layout, offering a natural arc typing position for wrists to aid with RSI and Carpel Tunnel Syndrome.
- Integrated wrist pad shaped to follow the ergonomic design of the keyboard and to support wrists comfortably.
- Designed with reverse tilt feet fitted at the front of the keyboard, meaning the keyboard angle can be set to a subtle reverse tilt so that wrists are in a natural position.
- Low profile tactile keys which have a high life cycle membrane key mechanism.
- Compact UK key layout with integrated multimedia functions (other language layouts available on request).
- Keycap printing is UV coated, just like on laptop keyboards to offer a very long life and prevent character wear.
- Clear easy read key legends.
- FN key to multiplex some keys, eg the multimedia functions.
- Integrated multimedia keys for Media Player, Volume control, Media control and playback, E-mail, Internet, Calculator and PC Lock. The Windows keys functions can also be locked via a simple shortcut if required.

Accuratus Curve - Wireless RF 2.4GHz Mini Curved & Contoured Keyboard

Natural Contour Full Size USB Keyboard with Wrist Rest

The Accuratus Curve keyboard is a new addition to the Ceratech portfolio. Designed to offer a Comfortable typing experience in a modern contoured chassis, with low profile scissor mechanism curved keys in the shape of an arc, the new Accuratus Curve is the ideal office and home ergonomic wireless RF 2.4GHz keyboard.

The 87 keys provide the features of a full 105 keyboard and include easy access multi-media keys for convenience, providing the optimal typing experience. The Accuratus Curve is the ideal companion to a home media or gaming system.

- Wireless RF 2.4GHz via USB nano sized 'plug and play' receiver, offering upto 15M wireless freedom.
- Black case and keys (other colours made on request).
- Manufactured with a sleek eye catching piano gloss black top case.
- Low profile keys which are tactile and have a high life cycle scissor key mechanism offering excellent durability and feel.
- Mini UK key layout with integrated multimedia functions (other language layouts available on request).
- Keycap printing is UV coated.
- FN key to multiplex some keys.
- Clear easy read key legends.
- Operates using 2 x AAA batteries, these are supplied with the keyboard.
- USB wireless receiver is nano sized, so when installed into a tablet, laptop or PC you can barely notice it is there. The nano receiver can also be stored in the battery compartment on the bottom of the keyboard.
- Power on/off button on the rear of the keyboard.
- Lightweight design, offering great portability.

KYB-CURVE-RFBK

The most ambitious design yet from the ergonomic collection is the Natural keyboard. Similar in shape to the Contour keyboard, the Natural version is raised in the middle for comfortable hand positioning. With split space bar for extra flexible typing, detachable magnetic wrist rest and futuristic font.

Available in multiple language layouts, as well as wired or wireless Bluetooth & RF options.

- USB wired 'plug and play' connection.
- Black case and keys (other colours made on special request).
- Sculptured and contoured design, shaped to fit the natural position of your hands and finger tips.
- Low profile tactile keys which have a high life cycle membrane key mechanism.
- Full size UK key layout with integrated multimedia functions (other language layouts available on request).
- Keycap printing is UV coated, just like on laptop keyboards to offer a very long life and prevent character wear.

- Attachable mouse tray section, easily fixes to the side.
- Light weight and high strength aluminium tray.
- Sturdy fully adjustable legs.
- Integrated non slip feed when used on tabletops / desks.
- Large integrated silent cooling fan, great for keeping your laptop cool.
- Collapsible frame, great for portability and easy storage.

LAP-INTEGERDESK

Our USB foot pedals are designed to allow the user control of their computer. Our 5mm key switch technology pedals are designed to assist where a keyboard or mouse alone is unfeasible. Some of the many applications include transcription, factory testing, controlling instruments, streamlining office work, playing games, controlling audio, speech therapy, and more.

Available as a single pedal or a 3 pedal option, our pedals can be used by feet or limbs for efficiency. They are the equivalent to a standard USB keyboard and mouse, and are fully customizable by using our software to define the foot press as a specific key, key combination or mouse action - no other software is required. Each pedal is fully programmable via our software and the programming is stored within the unit via a re-writable EEPROM - if required, multiple foot pedals can be connected to a single computer.

We also have a wireless version! The Accuratus BTX1P can be connected to various Bluetooth® enabled devices such as PC's, Phones, and Tablets. The BTX1P comes with an additional USB cable for programming the pedal output.
