

Proposition 65 Conformity

We have read and are familiar with the legal and administrative requirements under California Proposition 65 (The Safe Drinking Water and Toxic Enforcement Act of 1986). Contrinex certifies that it is complying with and will continue to comply with California's Proposition 65.

When used under normal operating conditions as stated in the applicable datasheet, Contrinex's products do not—to the best of our knowledge—present a possibility of exposure to any chemicals listed in California's Proposition 65 law: (<https://oehha.ca.gov/proposition-65/proposition-65-list>).

Contrinex's products, however, may contain chemicals listed in California's Proposition 65 law, such as Lead, that could result in exposure during abnormal use, such as—but not limited to—destructive decomposition. Appropriate measures must be taken into account by the customer in such situations.
