Aaga - How it works
Using this ultra simple composter

All good things come in pairs
Basic Aaga Kit for 18 kgs per day

Recommended product mix for composting

- Aaga 1
- Aaga 2
- Rake
- Gloves
- Remix Powder
- Bowl for BTM and leechate removal
- Microbes

This product works on the principle of hot pile composting and temperatures reach up to 75 degrees centigrade for optimum results
Preparation
Before putting any kitchen waste follow these two steps in both Aagas.

STEP 1
Fill in the Aaga from the top with 4 buckets (15 litre) of dried leaves.

Ensure that the leaves are evenly put and there are no empty spaces left on the base.
Preparation

Before putting any kitchen waste follow these two steps in both Aagas.

**STEP 2**
Add 2 buckets (15 litre) of Remix Powder on top of the leaves - EVENLY. Make sure it is spread around on the leaves.
Collection of Wet Waste from the community

Before beginning your daily collection of kitchen waste follow these steps

Add a 2 inch thick layer of Remix Powder inside each collection bucket.
Collection

*Carry the collection bucket to each home*

Empty out the wet waste of each home into the bucket and leave the container outside the home.

*Owners leave their wet waste outside their doors for collection*
Collection
Carry the collection bucket to each home

The bucket is filling up with kitchen waste of many homes
Adding Waste in Aaga

Your Daily Routine if your waste has a lot of water, meat, bad odor

After you collect waste from all homes add waste into Aaga 1

Mix in two fistfulls of Remix Powder in the bucket of the collected kitchen waste of many homes before putting waste into Aaga. Stir it in

Bucket should look like this after mixing in remix powder

The remix powder you had added in the bucket helps reduce smell of watery or smelly waste collected
Adding Remix Powder on top of kitchen waste layer in Aaga

Your Daily Routine
Add more Remix powder on top of kitchen waste. Layer all around as evenly as possible.

It is important to use Remix in the right quantities to avoid smell and wetness.

Remix Powder volume as recommended for your community.
Adding Accelerator once a week

In 250 ml of water and pour all over the kitchen waste inside Aaga

Microbes accelerator in powder form, add 1 tablespoon in 250 ml water and use
Open the leachate tap

Remember to open the leachate tap for all the Aagas for 15 minutes, twice a day.

If you throw this down the drain – please dilute and dispose. It is good for drain cleaning too.

Dilute it with 10 times the volume of water and use for plants as organic fertilizer.
Pipe leachate outflow

You can pipe a row of Aagas so that the leachate can go out anytime when it builds up.
General Reminders

Clean up your Aaga everyday after putting waste to make sure no flies are attracted.

Use the mosquito bat to swat excessive fruit flies.

Always lock the lid as precaution.
Important

Keep Side Doors always LOCKED. Open them only for harvesting.
When Aaga 1 is full begin filling Aaga 2
By the time the Aaga 2 if full the material in Aaga 1 will be ready to harvest

Lock all doors and lid of Aaga 1 and leave it be till Aaga 2 gets filled. You do not need to open till then

Fill Aaga 2 till the top only then harvest material in Aaga 1
Harvesting

*Your own organic compost*

Empty out the Aaga unto a tarpaulin sheet.

After emptying out Aaga 1, begin the cycle of preparation and filling again.

You will open Aaga 2 only when you have filled Aaga 1 again.
Dry out if still wet. Sieve if necessary to get compost in powder form. Add the big parts back into the Aaga.

**Finishing**

*For large scale compost generation*

Dry out if still wet. Sieve if necessary to get compost in powder form. Add the big parts back into the Aaga.
