<b>Fire/Explosion Hazard</b>	Not classified as flammable, but in case of fire: Evacuate area and contact emergency services. Toxic gases may evolve, when heated. Remain upwind and notify those downwind of hazard. Wear full protective equipment, including Self Contained Breathing Apparatus (SCBA), when combating fire. Use waterfog to cool intact containers and nearby storage areas.

## SECTION 6. ACCIDENTAL RELEASE MEASURES

### Personal precautions, protective equipment and emergency procedures

See Section 8

### Environmental precautions

See Section 12

### Methods and material for containment and cleaning up

<b>Minor Spills</b>	Clean up all spills immediately. Slippery when spilt. Avoid breathing vapours and contact with eyes. Contain and absorb spill with an inert dry material and dispose of in appropriate waste container.
<b>Major Spills</b>	Stop leak if without risk. Slippery when spilt. Clear area of personnel and move upwind. Alert Fire Brigade and tell them location and nature of hazard. Wear breathing apparatus plus protective gloves. Prevent, by any means available, spillage from entering drains or water course. Contain and absorb spill with an inert dry material and dispose of in appropriate waste container. No smoking, naked lights or ignition sources.

## SECTION 7. HANDLING AND STORAGE

### Precautions for safe handling

<b>Safe handling</b>	Avoid eye contact and prolonged skin contact. Avoid inhalation of vapour, mist or aerosols. Do not ingest.
<b>Other Information</b>	Keep the product in the original packaging away from light, heat and in dry place. Keep containers securely sealed. No smoking, naked lights or ignition sources.

### Conditions for safe storage, including any incompatibilities

<b>Suitable Container</b>	Packaging as recommended by manufacturer. Check all containers are clearly labelled and free from leaks.
<b>Storage Incompatibility</b>	Not Applicable

## SECTION 16. OTHER INFORMATION

---

Classification of the preparation and its individual components has drawn on our knowledge and review using available literature references. The SDS is a Hazard Communication tool and should be used to assist in the Risk Assessment. Many factors determine whether the reported Hazards are Risks in the workplace or other settings. Risks may be determined by reference to Exposures Scenarios. Scale of use, frequency of use and current or available engineering controls must be considered. This document is not intended to be an all inclusive document on world wide hazard communications regulations.
