# GFE POWER PRODUCTS DEALER NETWORK BECOME A DEALER

Are you passionate about engineering and eager to represent top-tier power products? At GFE, our dealers are more than just sellers; they are knowledgeable partners who embody the spirit of British engineering excellence.

## WANT TO BE A DEALER? HERE'S WHAT WE LOOK FOR:

Think you have what it takes to join the GFE family? Check out our criteria. If you don't quite tick all the boxes, don't worry – we're here to help you build the necessary knowledge and skills through comprehensive training.

### EXPERT KNOWLEDGE & ENGINEERING SKILLS

Our dealers are well-versed in the technical aspects of our products

### SALES & MARKETING SUPPORT

We provide support in sales, marketing, and business strategy to ensure your success.

### FINANCIAL AWARENESS & STOCK MANAGEMENT

You'll receive guidance on financial planning, stock holding, and logistics.

### SERVICE & SUPPORT EXCELLENCE

Our dealers offer installation, support, service contracts, and upsell services to enhance customer satisfaction.

The image shows a large industrial electrical cabinet in the foreground, with the GFE Power Products logo on a wall behind it. The logo consists of the letters 'GFE' in a large, stylized font, followed by 'POWER PRODUCTS' in a smaller, sans-serif font. The background is a dark, corrugated metal wall.

# TRAINING AND DEVELOPMENT DEALER SUPPORT

## WHY PARTNER WITH GFE?

GFE gives energy to all parts of your business, from internal operations to external customer interactions. We take a slow, systematic approach to building and understanding your business needs, ensuring you have the support and resources to thrive.

## WHAT SETS US APART?

We offer what your existing supplier might not: comprehensive sales, marketing, business strategy, financial awareness, stock holding, fund planning, logistics, and engineer training. While we can't be on the ground with you, we ensure our dealers are fully equipped to stock and support our products.

## READY TO GET STARTED ON YOUR DEALER JOURNEY?

Have more questions or ready to become a GFE dealer? Reach out to our team for personalised assistance and take the first step towards a successful partnership.

Don't miss out on the opportunity to represent top-tier British engineering products and receive unmatched support.

# CONTINUOUS POWER ACCESSORIES

## GFE AUTOMATIC TRANSFER SWITCH (ATS) PANELS

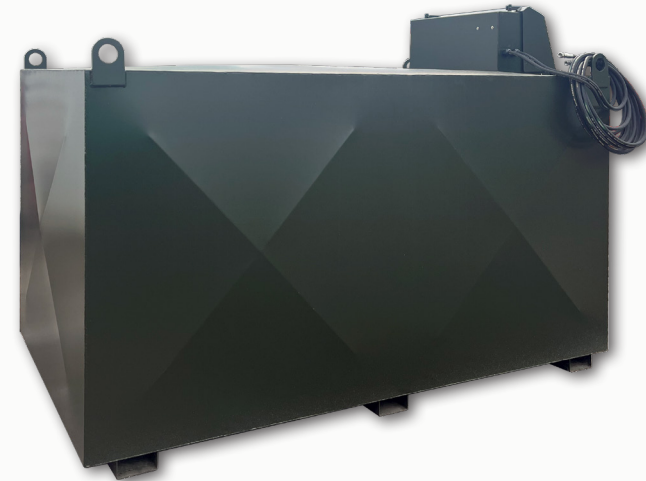

Throughout the 'GFE Powered By' range we offer an optional accessory of a changeover switch which includes an integrated mains detection system for 24 hour power protection and peace of mind. The system enables automatic start-up and operation of generator sets in the event of a mains power failure, overvoltage, or loss of a mains automatic re-transfer once it comes back. Configurable in open, closed and programmed transition operating modes. Designed to interface seamlessly with GFE generators and switchgear. With easy installation, wall-mounted and floor standing options.

## GFE BUNDED FUEL TANKS

We have a wide range of GFE bunded fuel tanks. These fuel storage containers consist of two layers of tanks. The inner tank is designed to hold the fuel, while the outer tank, known as the bund, acts as a protective casing that provides a secondary containment system. The purpose of this design is to prevent fuel leakage or spillage from contaminating the surrounding environment in the event of a tank failure or rupture.

We offer a comprehensive selection of bunded fuel tanks suitable for various generator sizes and applications. Our fuel tanks can be tailored to meet specific demands, ensuring a perfect fit for your clients' needs.

## COMPLETE PACKAGE PARTS & SERVICE

The GFE Power Products philosophy is to offer a customer centric approach when supplying power solutions. As a complete service package, we can supply spare parts, components and consumables, as well as offering training and business support to help our clients grow their businesses in a sustainable way.

We take pride in our dedication to supporting our customers through advice, knowledge, training, warranty, and after sales support. We hold a large existing stock of parts from the leading brands of Perkins, FG Wilson, Caterpillar, CPG Cummins, Volvo, SDMO, Kohler and John Deere. Our direct access to manufacturers enables us to support our customers' needs and deliver within an efficient lead time.

### ENGINEER SUPPORT

At GFE Power Products we have access to a UK-wide network of engineers who support our products and services in the UK. In addition, we have the technical know-how to support our dealers internationally.

# ASSURANCE AND PROTECTION WARRANTY AND AFTER SALES SERVICE

To give additional peace of mind, we are proud to offer a warranty to GFE distributors, dealers and authorised representatives. The generators require commissioning from an authorised representative. Warranty coverage begins on the start-up date for equipment registered within six months of purchase, as per the GFE terms and conditions of sale. Our warranty is offered with support from the key component manufacturers, who have localised representatives in most territories across the world.

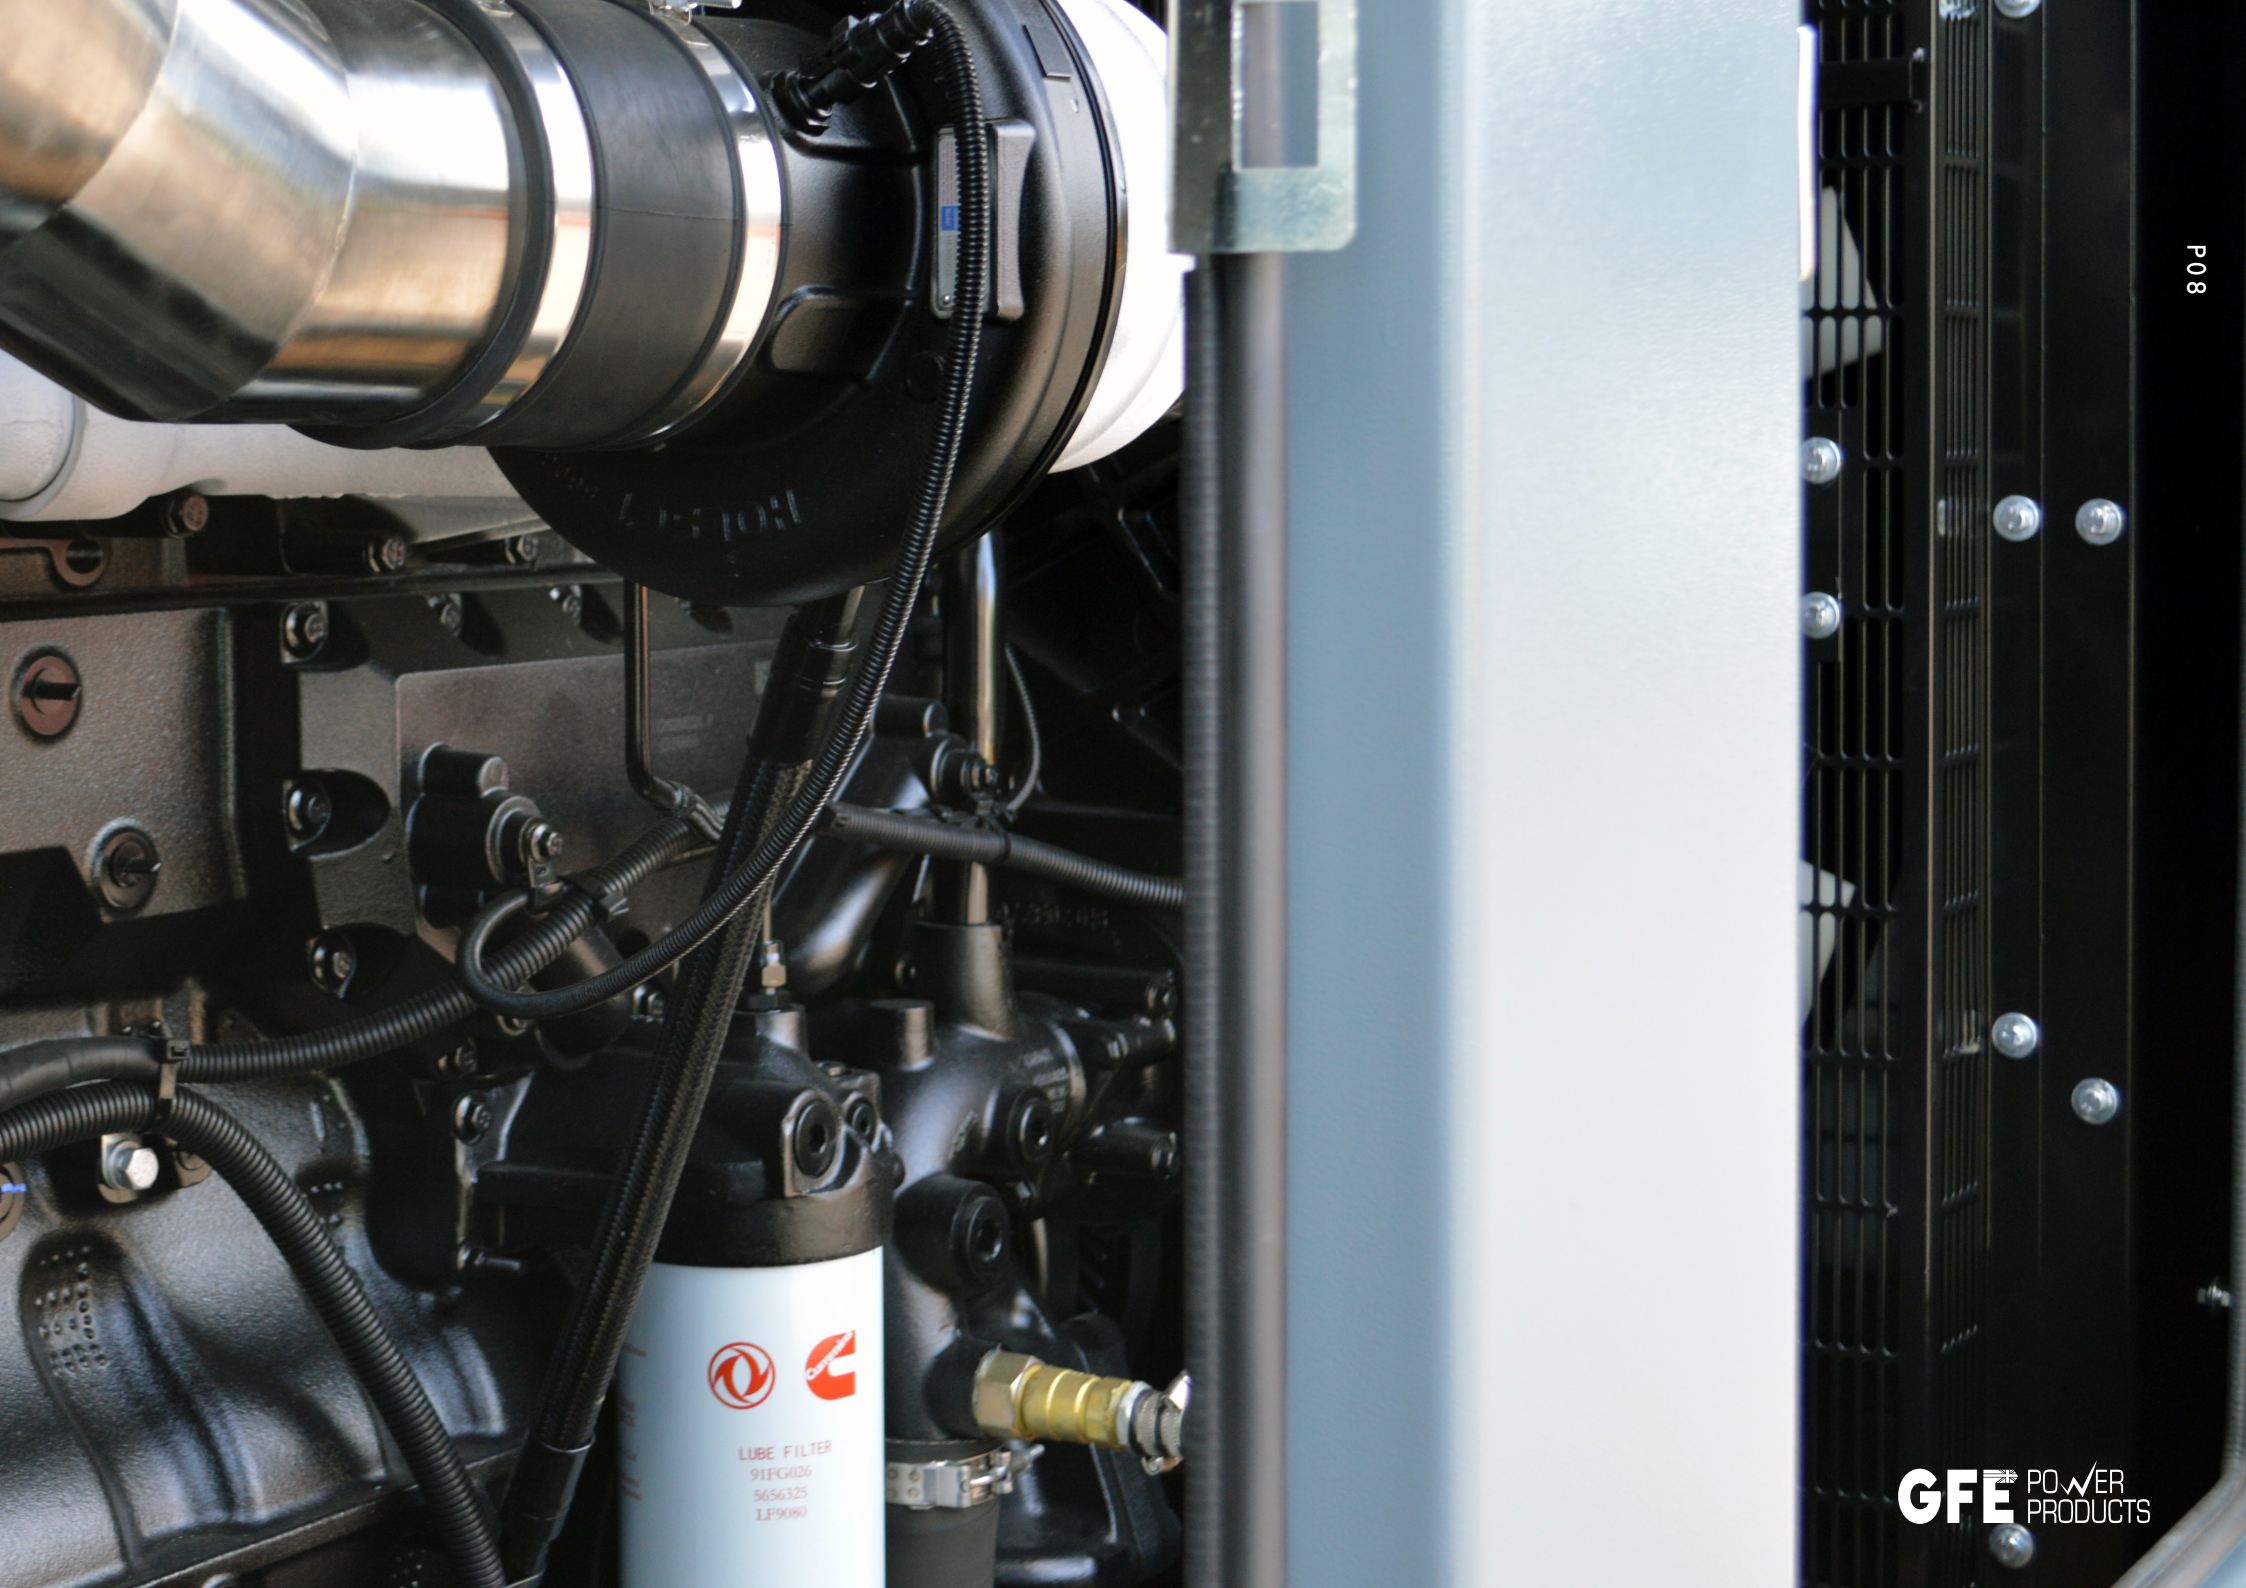

The warranty does not apply to malfunction caused by damages, repair or service by unauthorised persons, unreasonable use, misuse, or normal wear and tear. The warranty is supplied strictly in accordance with GFE's terms and conditions of sale and as per the warranty manual, which is available on request.

## **WARRANTY COVERAGE**

Generators in standby application are covered by a 1 year or 1000 hour warranty whichever is first. Longer warranties are available subject to engine manufacturer terms and conditions. The warranty starts from the date of shipment from the factory or registered start-up date.

# GFE POWER PRODUCTS

## ABOUT US

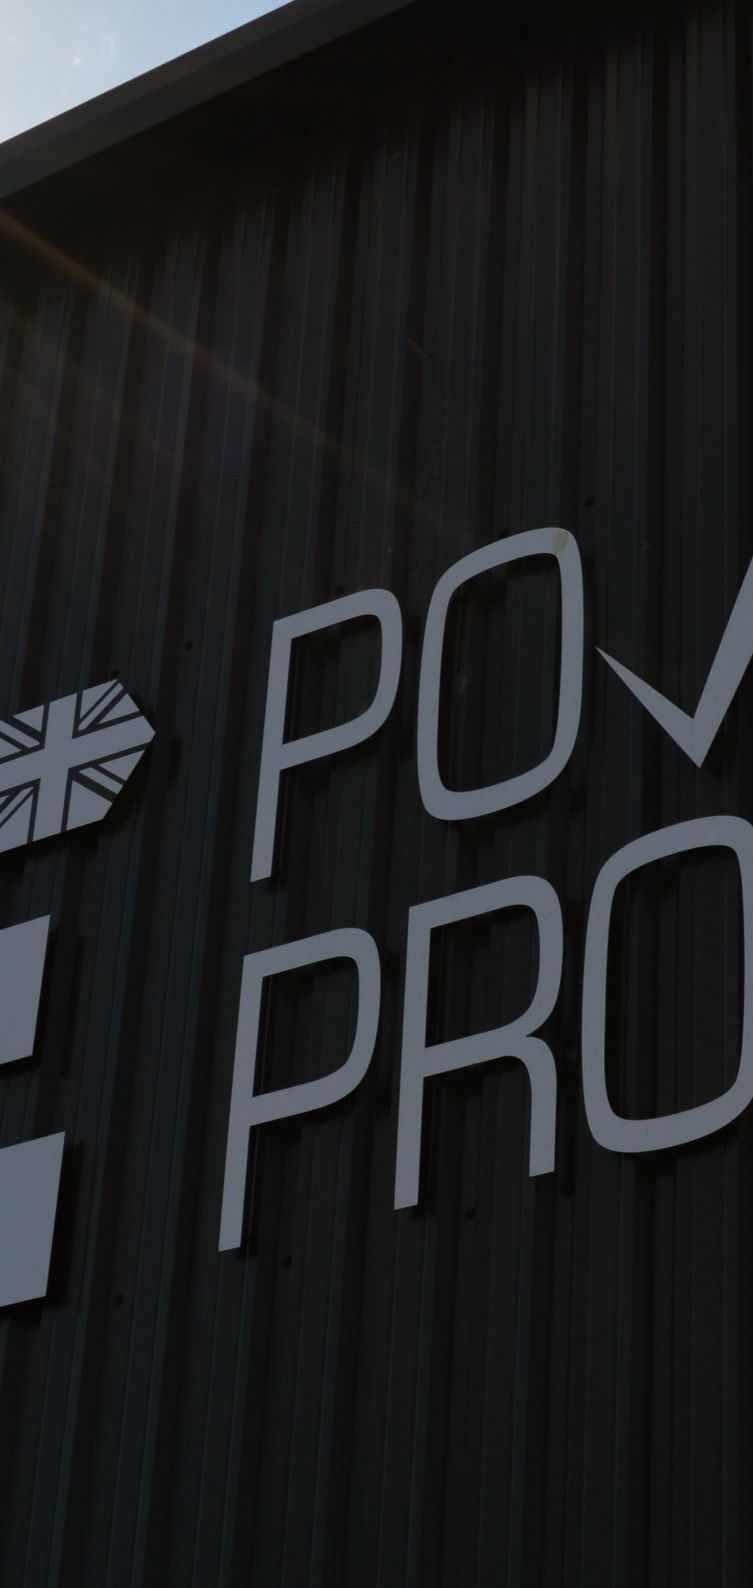

GFE Power Products is a British, ISO 9001:2015 certified leader in the design, manufacture, supply and distribution of diesel, petrol and Original Equipment Manufacturers (OEM) power generation equipment ranging from 2kVA up to 3000kVA.

We hold a large range of products in stock from 10kVA to 1000kVA and ensure that genuine spare parts and accessories are readily available for our power products dealers.

We have combined best-in-class components to create a range of ultimate high performance gensets from 2kVA up to 3000kVA. GFE Power Products generators are assembled, then Pre-Delivery Inspected (PDI) and tested in the United Kingdom at the GFE headquarters and global distribution centre in Worcestershire.

With over 100 years of combined experience in the diesel engine and generator industry, the GFE Power Products team have a considerable amount of experience to draw upon. Their hands on approach means that they are involved in every aspect of the day to day running of the business. We are based in Pershore, Worcestershire where we have the ability to assemble, test and distribute our products globally. The relationships built over this time give us access to the leading brands and suppliers such as Perkins, Volvo, FG Wilson, CPG Cummins, CAT and KOHLER SDMO.

## CUSTOMER FOCUSED OUR CORE VALUES

At GFE Power Products, our commitment to being customer-driven is at the core of everything we do. We don't just aim for success within our own business; we are deeply invested in the growth and success of our dealers and their businesses. Our customers' prosperity is our priority, and we take pride in playing an active role in helping them achieve their goals.

We understand the importance of being responsive and are readily available to offer expert advice and support. Through open collaboration and sharing of insights, we foster intelligent problem-solving within our organisation, ensuring that our solutions are always aligned with our customers' needs. Operating in an environment built on transparency and trust, we consistently deliver the right solution, tailored to the unique challenges faced by each customer.

As a proud British company, we embrace a direct yet caring approach that has enabled us to forge strong, lasting relationships with manufacturers. This dedication to quality and reliability allows us to source top-tier equipment and components efficiently and ethically, ensuring that our supply chain meets the highest standards. At GFE Power Products, we are driven by the vision of delivering reliable generator power solutions to every corner of the world. Our focus on customer values, ethical sourcing, and intelligent solutions propels us towards that goal, one successful partnership at a time.
