Ratings	All three phase generator sets are rated at 0.8 power factor. All single-phase generator sets are rated at unity or 1.0 power factor.					
Prime output	This rating is applicable for supplying continuous electrical power at variable load. There is no limitation to the annual hours of operation and this model can supply 10% overload power for 1 hour in 12 hours.					
Standby output	This rating is applicable for supplying electrical power (at variable load) in the event of a utility power failure. No overload is permitted on these ratings.					

The above ratings are in accordance with ISO8528-1 and ISO3046-1. Standard reference conditions: 25°C, 100m A.S.L., 30% relative humidity.

## **Enclosure / Canopy**

"Ensure a quieter life with our sound attenuation system."

#### Features

Extremely rugged and highly corrosion resistant construction
Unique appearance with high sound absorbing and thermal properties
8-12 hours built-in fuel tank integrated into the skid-mount base
Excellent design and craftmanship
Full weatherproof enclosure, suitable for operations in harsh condictions
Thermo-acoustic installation which can withstand fire, high temperature and severe conditions
Residential exhaust muffler manufactured from galvanised steel
High quality polyester powder paint
Designed on modular principles with interchangable components permitting on-site repairs
Easy commissioning and maintenance
Control panel viewing window with lockable access door for quick, safe and easy monitoring
Side doors allowing 180° opening for easy accessibility
Lifting point for easy mobility
Lube oil drain and radiator drain
Internally mounted exhaust silencers constructed to withstand rough conditions
Security and safety
Earth leakage protection
Secure and lockable access doors for fuel fill and battery
Fully guarded cooling fan and battery charging alternator

Emergency stop push button mounted on the enclosure exterior for urgent and safe shutdown

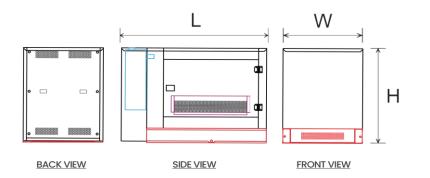

Efficient management of cooling air to avoid high water temperature

#### Transportability

Top access lifting points for crane lifting Fork lift pockets for easy moveability

#### Overall dimensions, weight and noise

Frame type	Dimensions	Weight	Base tank @100% load		Noise level
	(L x W x H ) mm	kg	Hours	Litres	dB(A) at 7m

## **Automatic Transfer Switch**

A.T.S - 4 Poles

GFE offers as an optional accessory, not only a changeover switch but also an integrated mains detection and switch system for your 24 hour power protection. The system enables automatic start-up and operation of the generating set in the event of a mains power failure, overvoltage or loss of a mains automatic retransfer once it comes back.

#### System advantages

Automatically transfer and re-transfer load from main power to gen-power without operator intervention (both automatic and manual)

ATS Controller (AMF function), seamless integration with all GFE ATSs

Available from 32 - 4000A

Available in standard, bypass isolation and service-entrance configurations

Configurable in open, closed and programmed transition operating modes

Designed to interface seamlessly with GFE generators and switchgear

Drip proof IP42 enclosure

Easy installation: wall-mounted and floor standing

### Warranty

GFE distributors, dealers or authorized representatives have warranty providing the operator performs a start-up within 6 months of the date of shipment from the factory, warranty coverage will begin on the start-up date (registering the start-up date to GFE within 6 months is essential and can be enforced). This warranty does not apply to malfunction caused by damages, unreasonable use, misuse, repair or service by unauthorized persons, or normal wear and tear. Warranty is supplied strictly in accordance with GFE's terms and conditions of sale and as per the warranty manual available on request.

#### Warranty coverage

Generators used with commercial utility source: One (1) year or 1000 hours (whichever occurs first) from date of shipment from the factory or registered start-up date.
