PAMPER YOUR LOOK WITH A ROYAL TOUCH

Directions

1. Wrap a thin strip of paper around the base of your finger. If you have larger knuckles, measure both. (You may want to choose a size between the two to allow the ring to slip on comfortably.)
2. Mark the spot where the paper meets.
3. Measure the paper's distance with a ruler.
4. Use the chart to determine ring size. To size a ring you already have, lay it directly onto the chart so that the black circle touches the ring's inner circle.

NECKLACE SIZING

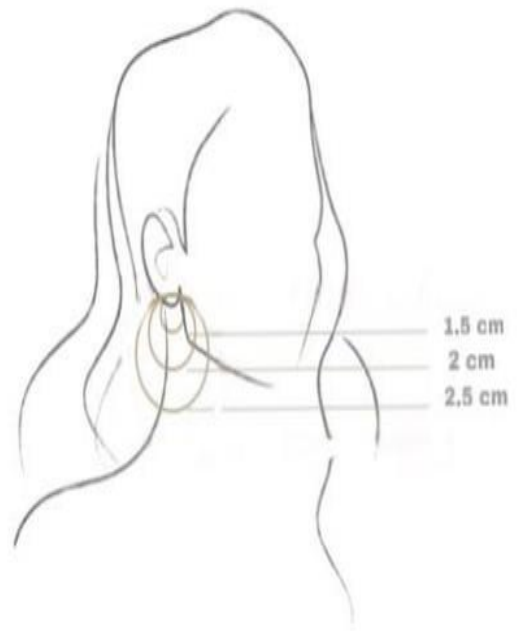

- * Some of our necklaces are adjustable.
- * Use the illustration below to find the size of your necklace.

Earrings

Achieving the stack of your dreams is easier than you think!

Keeping things simple, we've split our hoops out into S, M & L categories.

We recommend starting big and working down the sizes as you move up the lobe.

Determine the suitable bracelet length

Use a flexible measuring tape, string or a paper strip and measure your wrist just above the wrist bone. Measure the wrist circumference and be sure that the tape is snug (add approx. 1 cm for correct fitting). This is your wrist circumference and also the **internal perimeter**, which is used to select the proper size. Your measurement should be such that you can slide your pinky (little finger) under your measuring tape, string or paper strip. Measure with a ruler or measuring tape.

For example: if you measure a wrist circumference of 16,5 cm you will check the table for the 17,5 cm. The right length depends on how you like to wear your bracelet, looser or tighter. According to our sales experience, most customers opt for a well-fitting bracelet, not a dangling one. Most bracelets are only available in one or two sizes. The size and inner circumference can be found in our product description of the bracelet.
