Tables

ES2000

The [ES2000](#) is an innovative chiropractic adjusting table that possesses an array of features to support chiropractic therapy and patient comfort. Its patented ErgoStyle Drop elevates the whole cushion, providing more smooth and accurate adjustments. Additionally, it has a modular design that creates for simple upgrades and modifications.

Patient comfort is paramount with a 22.5-inch-wide seamless cushions featuring multi-density foam and ankle rests. The ES2000 contains everything a practitioner needs down to the details, even including a paper roll cutter and holder.

Ergostyle ES2000 Gen II Elevation Table

DOC Decompression Table

The [DOC Decompression Table](#) features a traction belting system, allowing for optimal decompression throughout treatment. In addition, its user-defined relax and hold times and adjustable speed settings allow for individualized therapy. It is also equipped with pre-programmed decompression protocols for ease of use for both lumbar and cervical decompression. Additionally, its real-time digital tracking offers a constant log of therapy progress, assisting chiropractors in their practice.

DOC Decompression Table

Lloyd Galaxy Hylo

The [Lloyd Galaxy Hylo Table](#) by Lloyd Table Company is an innovative solution for chiropractic adjustments. It provides a hydraulic tilt between horizontal and 70 degrees, allowing for varied positioning depending on the patient and treatment. Together, the hydraulic extension retraction, variable speed options, and different drop options (chest lumbar, pelvic, and ankle drop) makes this a versatile medium for all types of clinical uses.

Not only is the table effective and cutting-edge, but it looks nice too, equipped with durable Naugahyde upholstery and a one-piece chest cushion for further patient comfort. It also prioritizes safety with a tilt safety switch.

Lloyd Galaxy Hylo

Leander 950 Series

The [Leander 950 Elevation](#) offers motorized continuous passive motion distraction and flexion. It provides variable speed and height adjustments for individualized and optimal delivery of therapy. Additionally, it is equipped with front lateral flexion with variable lock, allowing providers to target certain areas.

The Leander 950 prioritizes convenience without compromising patient comfort and safety. The plug-in electrical foot switches and central caudal section mount controls provide ease of access. The break-away abdominal section is comfortable for patients, and the shut-off switch provides additional safety.

Leander 950 Series

Electrotherapy

Intellect TranSport Ultrasound Machine

The [Intellect TranSport Ultrasound Machine](#) is a portable ultrasound machine that leverages ultrasound waves to stimulate the muscles, thus supporting rapid injury recovery and relieving joint pain. This device is watertight, meaning that it can be used under water. In addition, it is lightweight weighing only a couple of pounds, so it is easily portable to take wherever you need to go. The ultrasound machine also features ten memory positions, meaning providers can store and access individualized therapy settings, promoting more personalized patient care.

Intellect TranSport Ultrasound Machine

Ultima 20 TENS Unit

The [Ultima 20 TENS Unit](#) provides an innovative and effective solution to pain. This five-mode device features dual channels, three wave forms, 20 treatment modes, and 12 preset modes, packing everything you need into one tiny device.

Therapeutically, the Ultima 20 TENS Unit delivers gentle electronic stimulation for the purposes of knee, lower back, and neck pain. Both pulse frequency and width can be adjusted, allowing for individualized and tailored treatment.

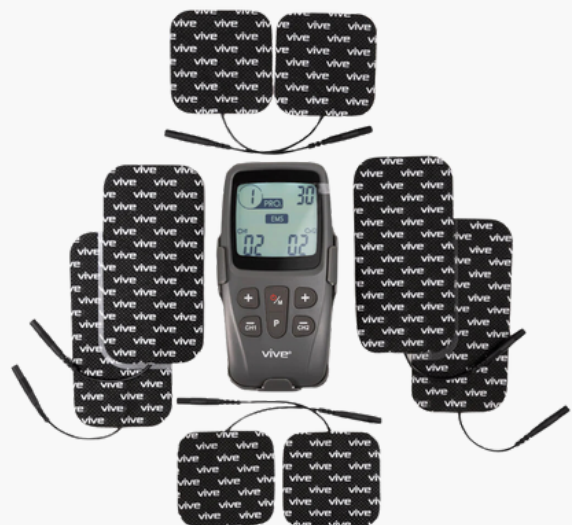

Ultima 20 TENS Unit

EMS TENS Unit

The [EMS TENS Unit](#) is a non-invasive treatment option for dealing with pain. It features 22 modes with 40 intensities, allowing for individualized pain relief for clients. With eight electrode pads, the EMS TENS Unit can be used on different muscle groups, supporting muscle recovery, and enhancing blood circulation for stiffness, pain, and soreness.

This unit is convenient thanks to its belt clip for hands-free use, portable and compact design, and two lead wires.

EMS TENS Unit

emFieldPro

The [emFieldPro](#) is a cutting-edge electrotherapy cart. It features powerful high energy inductive therapy (HEIT) with as many as three Tesla to provide muscle stimulation. Via this mechanism, the technology penetrates deep into the bones, organs, tissues, and cells to stimulate the muscles, nerve cells, and blood vessels.

The emFieldPro incorporates seamlessly into any chiropractic practice, with its easy setup, quick therapy time of 10 to 20 minutes, and unattended treatment option. Additionally, patients do not need to disrobe, and consumables are not required. It also includes two applicator heads for both dynamic and static therapy.

emFieldPro

Zimmer OptonPro 25

The [Zimmer OptonPro Laser Therapy System](#) provides high-energy laser therapy, producing as much as 25 W and 810, 980, and 1064 nm wavelengths. The laser applicator is ergonomic and equipped with an adjustable switch for ease of use, coupled with exchangeable spacers for precise applicator placement.

Zimmer OptonPro 25

Zimmer enPulsPro

The [Zimmer enPulsPro](#) offers a non-pharmacologic treatment option for chronic pain in the foot, ankle, and heel. As a non-invasive therapy, it requires no anesthesia and no patient downtime, delivering rapid five-minute treatment sessions. Using radial pulse therapy, the Zimmer enPulsPro is a great option for chiropractors hoping to address muscle and soft tissue pain.

Pain management

Stopain

The [Stopain](#) brand features an innovative topical pain relief formula. Stopain products include 10% menthol and penetration enhancers that optimize pain absorption, thus providing faster and more effective pain relief. The formulation also contains a unique polymer technology that makes application easy, smooth, and consistent.

Leveraging these therapeutic mechanisms, Stopain produces clinical gels, sprays, roll-ons, and migraine and headache solutions. Thus, Stopain provides pain relief solutions for all types of pain and client needs.

Stopain® Clinical Gel

HealthLight Knee and Shoulder Pad

Light therapy is an innovative treatment modality that should be a part of any holistic chiropractic practice. The [HealthLight Knee and Shoulder Pad](#) comes equipped with 180 LED lights aimed at healing and relieving pain. This pad is specifically designed for the shape of the shoulder and knee, with individual flaps that provide a customized fit on any patient's shoulder or knee.

In terms of its therapeutic capacity, it elicits 152.3 joules per minute of infrared therapy and also features 72 red diodes and 132 infrared diodes. It provides two options for color, including red and infrared.

HealthLight Knee and Shoulder Pad

Massage

Calf and Foot Compression Massager

[The Calf and Foot Compression Massager](#) helps to minimize muscle tension in fatigue specifically in the feet and calves. It elicits heat together with targeted compression to decrease swelling, increase circulation, and treat conditions such as arthritis and plantar fasciitis.

Though compact, the massager can fit calves up to 21 inches and feet up to 14 inches and includes two extenders. It is integrated with a control panel, where massage modes, heat, and intensity levels can be adjusted for a customizable treatment experience.

Calf and Foot Compression Massager

The Calf and Foot Compression Massager is designed with high-quality materials, allowing for long-term use thanks to its durability. It is a great option for anyone needing calf and foot relief, including runners and other types of athletes.

Neck Massager

This [Neck Massager](#) by Vive-Health is equipped with infrared heat, allowing for deep relief of muscle stiffness and tension. It enhances the massage experience by offering four separate massage nodes and a padded cover, relaxing and soothing the muscles around the neck area. Additionally, it has an eight-foot power adapter for added convenience.

Neck Massager

Serola Sacroiliac Belt

Sacroiliac belts offer lumbar support specifically geared towards the sacroiliac muscle. The [Serola Sacroiliac Belt](#) is a great example of a sacroiliac belt, helping to support and compress the sacroiliac joints. Doing so minimizes stress while increasing stability.

The Serola Sacroiliac Belt specifically includes hook-and-loop straps that secure the belt to the waist. With patients wearing this belt frequently, Serola prioritizes durability, ensuring that it can withstand general wear and tear over time. In addition, it possesses moisture-wicking webbing, making it breathable, dry, and comfortable. Available in four sizes, the Serola belt can be used for patients of all shapes and sizes.

Serola Sacroiliac Belt

Exercise and rehab

Recumbent Bike

The [Recumbent Bike](#) is a great way to incorporate a low-impact workout for patients of all fitness levels looking to add in cardio and leg strength training. It features a step-through, steel frame and padded seat for maximal patient comfort. The bike has adjustable resistance, allowing for an individualized workout, and the programmable display helps to monitor progress.

Recumbent Bike

Bands and balls

Resistance bands are an easy way to incorporate strength training, stretching, and physical therapy on-the-go. Although bands are made with high-quality, durable materials, they are portable, convenient, and easy to use across a variety of muscle groups.

Exercise balls are yet another way to strengthen the muscles, helping to avoid back pain and improve posture. They can also improve endurance and range of motion while providing a medium for stretching, aerobics, and active workouts.

Resistance Bands

Exercise balls

Weights

Weights are an essential component to any routine hoping to strengthen the muscles or increase stamina. Thanks to their neoprene-coated metal, these **Neoprene Dumbbells** are both rust-resistant and durable, allowing for long-term use. They can be purchased individually, allowing for individualized workout options.

Neoprene Dumbbells

Diagnostics

Fitness Tracker Model: V

We've all heard of the fitness watches, but have you heard of the [Fitness Tracker Model: V](#)? This advanced device tracks activity while monitoring one's heart rate, sleep patterns, and more. Compatible with a mobile app, patients and providers can monitor stats and progress over time.

This fitness watch is convenient and durable for patients, featuring a water-resistant design, a sleek black or gray wristband, long battery life, and a complementary magnetic USB charger.

Fitness Tracker Model: V

Blood Pressure Monitor

Blood pressure monitors are a great medium for convenient and easy tracking of blood pressures, which can provide insight into patient care. This [blood pressure monitor](#) features a user-friendly design that can monitor as many as two users at once. It takes accurate measurements while storing previous readings for optimal monitoring.

Blood Pressure Monitor

ECG Monitor

The [ECG Monitor](#) provides an accurate yet convenient way to track someone's heart health. It is compatible with a mobile app, allowing individuals to store and track data, providing a comprehensive and accurate diagnosis. By detecting potential heart problems and abnormalities, an ECG monitor offers a means to providing preventative, proactive patient care.

In addition, the ECG Monitor is convenient with a rechargeable USB cable, light weight, portability, and user-friendly interface.

ECG Monitor

Other supplies

Headrest paper

While headrest paper may not be particularly new and innovative, it is still an essential component to any chiropractic practice. Headrest paper maintains the hygiene of your practice, providing a sanitary surface for patients during chiropractic care.

While headrest paper may seem straightforward, there are several things to consider when selecting your paper. Heavy [Duty Headrest Paper Rolls](#), for example, are durable because they are constructed from medical-grade materials. In addition, they are provided in a crisp white finish with matte and glossy sides, providing both a clean and aesthetic paper solution.

Headrest paper
