DESCRIPTION

LED RGBW Wifi Controller. Now control your LED RGBW lighting using your iPhone or Samsung Smartphone from anywhere. This controller with remote helps to connect your RGBW LED light strips to a wifi network. You just need to download a free app from your mobile phone and then start enjoying free control without looking around for IR remote.

It is compatible with Amazon Alexa, Google Assistant, IFTTT, and Google Home. Simply turn your led lights on/off, change brightness and colors by voice command. DIY your room or TV strip lights depending on various events by connecting it to IFTTT.
