

2 MARCH 2023

CANiK is excited to announce our partnership with 45 Blast! We're honored to work with such a highly innovative & respected company in the firearms industry. Their superior designs have won the admiration of all CANiK lovers since the first day it was launched. Today, 45 Blast's compensators are the perfect complimentary accessory, increasing the performance and aesthetic appeal of each specific CANiK handgun.

45 Blast was founded with the intention of bringing the best high-end compensators and accessories to match the acumen and growing prestige of CANiK firearms

What Does This Mean?

First, this means that 45 Blast compensators will be designed in collaboration with CANiK to fit new CANiK firearms. Select product designs will benefit from being worked on by the R&D departments at both CANiK and 45 Blast. This raises the bar with each compensator becoming a harmonious component of the engineering of its designated Canik pistol.

Second, This means that you will be able to purchase 45 Blast compensators exclusively through CANiK's channels for global market (outside of the USA), and from the 45 Blast website in the USA. This provides the ability to purchase the ideal compensator for your CANiK handgun at an actual CANiK store.

As CANiK, we continue to develop and expand our global accessory program with quality and unique products.
