HUB

The only self-contained
mobile wash unit in the world

CONCEIVED BY ROSSANO FERRETTI

Rossano Ferretti

DESIGNED BY GIOVANNONIDESIGN

WELCOME TO THE FUTURE

HUB

HUB is the innovative Maletti Group system, designed in cooperation with Rossano Ferretti and designed by Giovannoni Design studio, meeting the needs of the salon of the future. The device is also designed to meet the needs of freelancers, spas and private villas.

HUB is equipped with an electric power supply and a lithium battery (optional) with a duration of up to 20 cycles of use. It has a water storage-disposal system that allows it to be used anywhere without the need to create water and electric connections. It has a light and functional structure where to store tools (caps, combs, products, etc.) and equipped with four swivel wheels (two of which are braking) allowing easy movements on every floor surface.

Maletti Group, a leader in hairdressing furniture , barber salons, spas and wellness centers for 85 years, is now ready to present a revolutionary system in the world of beauty.

Thanks to many years of collaboration with the best designers, the company is always able to offer its customers unique furniture elements with a distinctive character that allow them to create a coordinated and welcoming environment, in order to offer a memorable wellness experience.

WORD OF...

ROSSANO FERRETTI

co-creator of the project

SUCCESSFUL ENTREPRENEUR IN THE HAIRSTYLE INDUSTRY WITH SEVERAL SALONS
IN THE BEST 5-STAR HOTELS AND IN THE MOST IMPORTANT CITIES IN THE WORLD

“Looking at the current global situation, I thought of a useful and supportive solution to my work, but one that could adapt to different realities. An idea that will allow to transform a current need into an experience.”

ELISA GARGAN GIOVANNONI

designer

ARTISTIC DIRECTOR OF THE MALETTI GROUP AND MEMBER OF
THE GIOVANNONI DESIGN STUDIO

“The project was conceived to enter different environments with a discreet elegance. We can describe it as a bentwood cabinet with a large ceramic basin, on top of a solid surface. The soft curves of the furniture enclose the technical parts, hiding their function. It is a wash unit on wheels; the basin is close to the height-adjustable chair and therefore the ergonomics of the posture are facilitated. HUB slides as a friendly character who helps in the comfort of customer service. For hotels, private homes, clinics, private cabins, spas, etc.”

SUCCESS STORIES

The prestigious Hotel Cheval Blanc in Paris, belonging to the LVMH group, was the first structure to have included HUB in the list of services dedicated to wellness, bringing the salon treatments directly to the client's suites. Thanks to the wheels, HUB recalls the tradition of hôtellerie.

Welcome to the future of Beauty Design

UNIQUE DESIGN AND FUNCTIONALITY

INTEGRATION

Integrated water system with double pump for mixing clean water and a macerator pump for draining. This system (after filling the tanks with water) carries out hair washing anywhere in the salon or bedroom.

POWER SUPPLY

Electric power supply or lithium battery (optional) with a duration of up to 20 cycles of use.

ACCESSORIES

Two side compartments for objects and a central one for easy access to the water tank.

MOBILITY

Four swiveling wheels, two of which are braking, to be easily carried on any type of floor (including carpet).
