

## Antennas 700-1000 MHz Antennas SE412-WBL - PIM Certified Series

### SE412-SWBP2L(YY)(DXX)

- Enclosed dipole, 5 dBd, Bi-directional, Low PIM, 746-960 MHz
  - Wide band design covers 746-960 MHz band
  - · Compact, enclosed antenna with excellent low intermodulation performance
  - PIP rated and low PIM

One wideband antenna for your 700, 800, 900 MHz systems. Sinclair's SE412-WBL series of enclosed dipole arrays offer excellent intermodulation performance, covering 746-960 MHz in a single antenna. These highly versatile antennas are particularly well suited to communication systems where a specific coverage pattern is required. These include cellular systems, trunked radio, paging, and data transmission, where predictable and highly reliable performance is a must. Designed for multi-channel systems, the PIP rated SE412-WBL series features low intermodulation products, highly rated average power and peak instantaneous power (PIP).

This antenna shall be mounted in an upright position.

When ordering, please refer to the chart below for the model number. Different configurations are subject to various list prices. Please contact your Sinclair Sales Representative or Customer Service Representative for more information.
