

C3024-3-2.5

Exp multicoupler, C-Series Res-Lok, pass-reject, 2.5 dB IL, 475-512 MHz

Also referred as: C3024*3-2.5

- Ease of field expandability with non-critical inter-channel cables and 2 MHz channel spacing
- Res-Lok design reduces inter-cavity cable requirements and losses
- Supports vertical or horizontal mounting in 19 inch rack
- Two band pass cavities and one reject cavity

The C-3024 consists of two bandpass cavities in conjunction with a reject cavity. This 'C' Series channel configuration is used where significant channel separation is available. Res-Lok construction minimizes the number of inter-cavity cables required, and also allows horizontal or vertical mounting in a 19 inch rack. Because cable lengths between 'C' series multicoupler channels are not critical, additional channels may be easily added in the field. However, in order to minimize losses due to cabling, these interconnecting cables should be as short as possible.
