

SC369-HF2L(YY)(DXX-ZZZ) Aurora™ collinear omni, 9 dBd gain, HD, Low PIM, PIP, 403-470 MHz

- Patent-pending Aurora™ design for exceptional performance
- Outstanding bandwidth with highly stable RF performance across the whole band
- -150dBc PIM rating for low noise characteristics, ideal for wideband or trunking systems
- Heavy-duty antenna in a relative compact form factor

Sinclair's SC369 series are broadband, heavy duty, omnidirectional antennas that cover the 350-512 MHz frequency range in different band splits. This antenna utilizes Sinclair's new patent-pending technology, which not only delivers outstanding bandwidth and unbeatable stable RF performance across the whole band but also resulting in enhanced wind rating due to the shortened total length comparing to traditional design. The industry-leading -150 dBc PIM rating provides low noise characteristics which makes it ideal for multi-channel systems.

Lightning protection: the antenna is fully DC grounded and it comes with a lightning spike projecting through the top of the radome to protect the antenna from lightning strikes. It's designed according to IEC62305 part 1-4 and VDE0855-300, and fulfills the requirements of lightning protection class II.

When ordering, please refer to the chart below for the model number. Different configurations are subject to various list price. Inverted and null fill versions are also available. Please contact your Sinclair Sales Representative or Customer Service Representative for more information.
