## Antennas Low Band, Aviation, and VHF Antennas SY2062(E) Series

## SY2062-SF3SNM(E)

Yagi directional, dual array, extended boom for end mount, 12 dBd, 157-164 MHz · Dual stacked for higher gain or bi-directional coverage

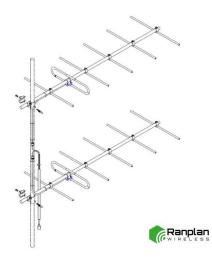

Also referred as: SRL2062EBNM\*3

- · Outstanding durability and performance
- · DC ground potential for lightning protection
- Mounting pipe is NOT included

The SY2062 series of antennas consists of two six-element Yagis of outstanding durability and performance. All elements including the folded dipole are maintained at DC Ground potential for lightning protection. All elements on this antenna are attached to the boom with solid cast aluminum clamps.

This highly versatile antenna is available as a standard mount Yagi (C version), or, as an extended boom (E version) mounted unit.

As with other Yagi's, this VHF antenna is available in multiple-unit arrays for added gain. Horizontally or vertically parallel kits of 'H' frames can readily be supplied to mount two or four Yagi's with a common feed.
