

TC3113 Hybrid-Ferrite Transmitter Combiner, 3 channel, single stage isolators, 400-512 MHz

- Supports extremely close frequency spacings
- Permit combining two or four 400-512 MHz transmitters into one antenna
- Compact 19 inch rack mount
- Ships in two boxes

These transmitter combiners can be used in those systems requiring extremely close frequency separations. They utilize Sinclair manufactured isolators, hybrid couplers, harmonic filters and terminations in a compact mechanical configuration. Standard configurations permit combining up to four transmitters into one antenna. For more than four transmitters, higher isolation, VSWR and power monitoring options, or unusual power requirements, consult Sinclair systems engineers.
