Airport Navigator Instructions

**PIGGY-BACK SHOULDER STRAP**

Use the included shoulder strap to “piggy-back” and counter-balance the Airport Navigator on the front of another roller. This technique allows you to carry extra weight more efficiently without the extra strain on your wrist.

**LAPTOP SECURITY STRAP**

Use the laptop security straps for quick access to your laptop.

**SECURITY STRAP TUCK-AWAY**

Pull the blue tabs on each side of the main compartment to tuck-away your laptop security straps when not in use.

**TOP LID HOLD-UP**

Access your gear quickly while you shoot by extending the retractable handle through the fixed handle on the top lid.
