Step 1:
Start by taking a top-down photo of your divider and gear layout for reference when reassembling your bag. Remove all dividers and set aside.

Step 2:
Lift the bottom flap then peel back and position the molded, padded insert to gain access to the retractable handle assembly.

Step 3:
Using a Phillips head screwdriver, remove the four screws that secure the handle to the bag. Set the screws aside for reassembly.

Step 4:
Open the top handle pocket, reach down, and pull apart the hook and loop. Remove the handle assembly out through the interior of the bag.

Step 5:
HANDLE INSTALLATION and REASSEMBLY
Handle installation is the same process, but in reverse.

Included with the kit:
- Replacement handle
- Other tools required but not included:
  - Phillips head screwdriver

HANDLE USE
Due to the weight of video and photographic equipment, we recommend that you do not lift the roller off ground or pull up stairs by the aluminum handle system. Please use the fabric handle on top of the bag itself.
