Be Ready "Before The Moment"

1. Connects to any Think Tank backpack
2. Webbing End Roll-up on lower strap
3. Middle connection strap

4. Camera Support Straps
5. Connects to any Digital Holster V2.0

Product Series Description:

The new Think Tank Photo Backpack Connection Kit mounts any size Digital Holster V2.0 to any Think Tank backpack. This is an essential accessory for photographers who need to keep a camera and their main lens close at hand with additional required photo gear in a backpack. The Backpack Connection Kit was specially designed to prevent the Digital Holster from excessive movement while being worn in front of the torso. The Backpack Connection Kit works exclusively with Think Tank Photo backpacks.

Key Features:

- Keeps a Digital Holster V2.0 snug against the torso
- Designed to keep bag stationary during extreme body movements
- Compatible with all Digital Holster V2.0 sizes
- Kit includes a pair of Camera Support Straps V2.0
- Keeps a camera ready with a lens and lens hood attached, in position
- Webbing End Roll-ups keep excess webbing slack neatly wrapped
- Fully adjustable, one size fits most
- Rugged straps and durable hardware
- "No Rhetoric" lifetime warranty

Specifications

SKU: 87453000 261 8 • Part Number: 261

- One size fits most
- WEIGHT: 8.6 oz (244 g)

Be Ready "Before The Moment"

Attach the Camera Support Straps V2.0, included with the kit, to flat webbing loops on the backpack harness straps. The Camera Support Straps use "Double Gate Keeper" buckles to connect to the loops. To open, push down on the tip, then swing the metal gate downward. Slide webbing into opening and close.

Locate the middle and waist straps in the kit that are joined on one side by a metal triglide (pictured above). The metal triglide slides flat into the first slot of the plastic triglide on most Think Tank backpacks (above, left). The metal triglide attaches in a similar fashion to backpacks with a D-ring (above, right).

To attach the Digital Holster V2.0 to the Backpack Connection Kit, first connect the metal ends of the gray Camera Support Straps to the metal D-rings at the top of the Digital Holster. Adjust the two support straps as needed, estimating a comfortable height on the torso to wear the Digital Holster.

Next, connect the middle straps to the small upper webbing loops on the back of the Digital Holster V2.0. Note that the middle straps have a heavy duty elastic ring near the back. The waist straps connect to the small webbing loops near the bottom. The middle and waist straps feature "Webbing End Roll-ups" that allow excess webbing to be rolled up then wrapped with hook-and-loop flaps so they stay out of the way.
