TRIPOD STRAPS

CROSS-BODY STABILIZER STRAP

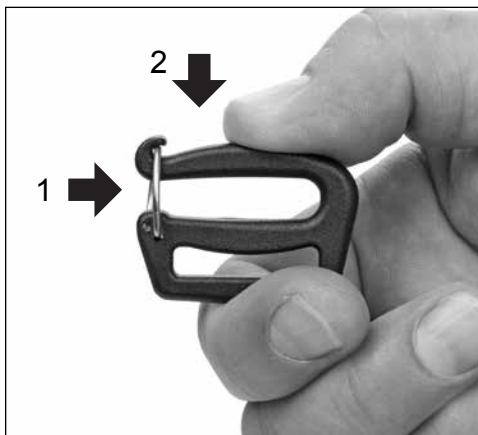

TRIPOD STRAP ATTACHMENT

To connect the tripod straps to the webbing on the Exposure, slide the open double gate keeper buckle through the webbing loop on the bottom of the bag and close it by depressing the top plastic bar and securing the gate.

CROSS-BODY STABILIZER STRAP ATTACHMENT

Step 1: Open the double-gatekeeper buckle by (1) pressing the metal gate inwards then (2) squeeze the top plastic bar to release the gate. To close, press the top plastic bar down and flip the metal gate over the hook.

Step 2: On the cross-body stabilizer strap, take the double gate keeper closest to the side release buckle and attach the cross-body stabilizer strap to one of the two loops on the shoulder strap.

Step 3: Attach the other double gate-keeper on the cross-body stabilizer strap to the attachment point on the back of the bag.
