

## Removal and Installation of the Tethered Combination Cable Lock

The tethered combination cable lock is located in the front exterior pocket of the Think Tank Photo rolling camera bag, as shown below.

### Removal and Installation Procedure:

**Step 1:** Pictured is the lock, as it is supplied and connected to the back within the front plastic pocket.

**Step 2:** Note how the cable is routed through the nylon loop that is permanently attached to the bag within the plastic pocket.

**Step 3:** To remove the lock, slip the lock through the loop in the cable as shown below and then pull the cable-end through the nylon loop on the bag. Installation is reverse of the removal process.
