A MindShift happens when we adopt a new point of view.
About MindShift

MindShift is a group of professional photographers and product designers who support the conservation and protection of our natural resources. Founded by the creators of Think Tank Photo and conservation photographer Daniel Beltrá, MindShift is dedicated to building innovative carrying solutions for those who are passionate about experiencing the natural world. Our slogan, “Engage with nature,” challenges people to not only become involved in outdoor activities, but to create a conversation about nature and our relationship to the environment.

MindShift originally introduced a revolutionary new backpack that featured a rotating belt pack, which enables the user to quickly, and easily access their gear. Featuring our patented “rotation180°” technology, the backpack was successfully backed on Kickstarter. Since then, many other users besides photographers have adopted the technology including hikers, mountain bikers, skiers, birdwatchers and fly fishermen.

Today, MindShift offers a wide range of products geared towards outdoor photography, action cameras, travel and adventure. We build our products with high quality materials, expert craftsmanship and attention to detail. Designed by the same team as Think Tank Photo, we have decades of experience in providing durable, lightweight and highly functional products that enable our customers to engage with nature.
The BackLight® 18L, with a rear-panel compartment for photo gear, allows you to access your gear without taking off the backpack.
