

Armrest “Matchline 355” (NEW 2022)

This armrest is suitable for most type of cars such as personal cars, light- & heavy trucks but also for marine/boat and handicap conversions etc. The armrest has a sleek and unique design and is available in many different colours and trim.

The adjustment rod is placed at the lower front side of the armrest (on the underside) that ensure an easy handling when adjusting the armrest up and down. The armrest can also be fully back folded.

The topcover is available in many different features -from basic version in black PUR-material. Also upholstered versions with leather/vinyl and textile are available in many different standards- and special versions. Ask us for more information.

The armrest is only 44 mm wide at the back and then expands to a full width of 65 mm in the front –which ensure a nice comfort for the arm. The design makes it possible to mount this armrest even in cars with very limited space between the seat and the door.

Data on the armrest.
