

Detachable Lower Pockets (20RES-40b)

1. Slide **S1** through top webbing closest to zipper, **S2** through top webbing on other side of belt loop and **S3** through top webbing farthest to the right. **S2** and **S3** are over top of the Quick Release Chest Harness.

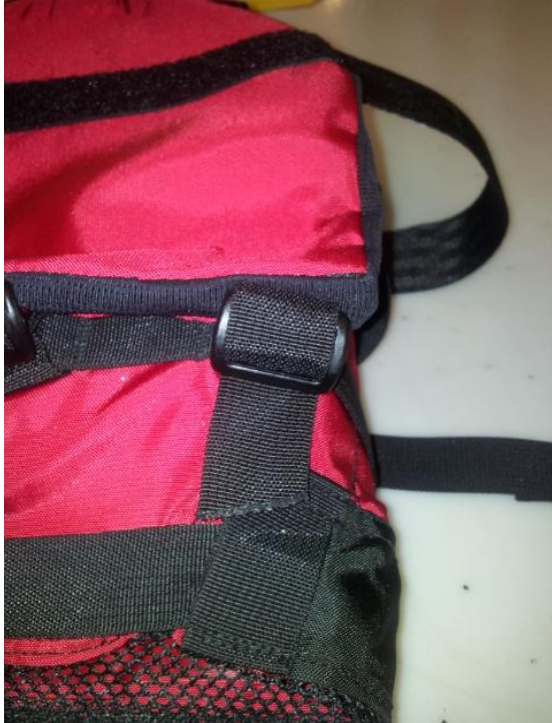

2. Lace the straps through the webbing loops alternating between loops on PFD and Back of Pocket.

3. Feed straps through **L1**, **L2** and **L3**.

4. Loop the straps back on themselves to secure.

Note: If installing both the top and bottom pockets, the easiest way to get both of the straps through the top webbing is to first pull the strap from the bottom pocket through, then pull through the strap from the top pockets underneath without the clip installed (needle-nose pliers help). Thread the clip on once the strap (**C2** from upper pocket) is through.
