

PFD Sea Link Tow Line (30SK-05e)

This compact system gives you the option of quickly turning a short 4 foot tow into a 15 foot tow line with the release of a buckle. It attaches to any quick release chest harness, has built-in floatation and shock absorber. It gives you the versatility you need for a quick rescue.

ATTACHING TO YOUR PFD

Open the quick release buckle on your PFD and remove the free end of the belt from the belt loops so it can be threaded through the 2 inch d-ring. This will position it at the back of the PFD. Re-thread the belt through the belt loops and secure the buckle. Now take the end of the Sea Link and attach the paddle carabiner to the front of the PFD so it can be accessed when needed.

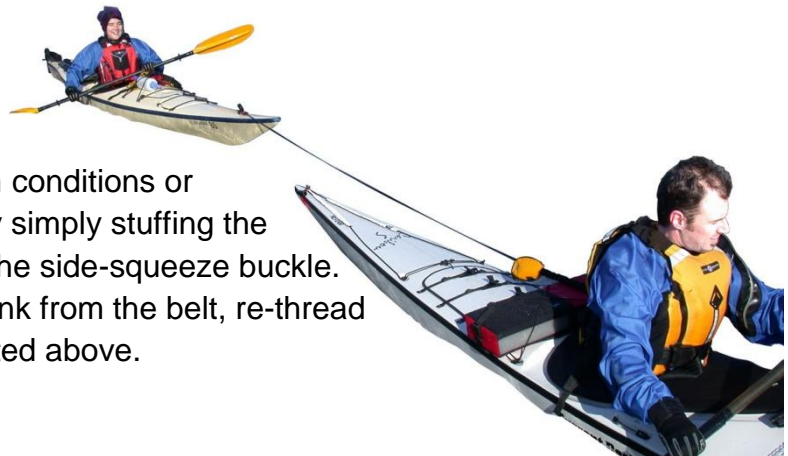

USING THE TOW LINE

Unclip the carabiner from the front of your PFD and clip it to the grab-loop or the security loop of the boat that you plan to tow. You will then be towing from a four foot line. If you require a longer line, unclip the side release buckle on the pouch. The line will thread out of the pouch as you paddle forward giving you a towing length of 15 feet.

In the event you need to disengage from the rescue quickly, simply release the quick release buckle on the PFD. The pressure of the tow will unthread the belt through the loops releasing the 2 inch d-ring and the tow.

RE-PACKING THE BAG

After a rescue, once you are in calm conditions or on shore you can re-stuff the bag by simply stuffing the webbing into the bag and securing the side-squeeze buckle. If you have disconnected the Sea Link from the belt, re-thread the belt through the d-ring as indicated above.

CARE INSTRUCTIONS

Clean salt, sand, and grit after use with fresh water. Do not store the product in damp conditions. Inspect the product for damage both before and after use. Do not abuse or apply undue stress to the product. Do not expose the product to long hours of direct sunlight. Indentify your name on the product in case of loss.

CAUTION

The water conditions in which this product is used are potentially hazardous and require experience and skill. Upon purchasing North Water Equipment, the purchaser / user is responsible for ensuring that they have the adequate training and experience necessary to operate in such conditions. The purchaser / user assumes all risks of injury or damage to themselves as well as loss or damage to any property. In purchasing / using these products (s)he agrees to hold harmless North Water Holdings Ltd., their officers, employees, agents, and representatives from any liability for injury or damage of any kind that may be suffered by the purchaser or others through the use of these products whether caused through negligence or otherwise.
