

## Canoe Thwart Bag (40CO-15)

The Canoe Thwart Bag is a tremendously convenient and versatile System. It is great for those items you want close at hand. This bag attaches to any thwart, to the underside of your seat, or the inside of the gunwale. It can also be used as a fanny pack for on-shore excursions. The bag comes complete with a waist strap and two 1" Lightweight D-Rings.

**Size: 7" Deep x 6" High x 13" Wide**

### INSTALLATION

There are many different ways to mount the Canoe Thwart depending on your needs.

- 1) **Thwart:** Adjust the mounting straps to suit the size of your thwart or yoke. If you wish for your bag to hang level, keep the straps going through the centre webbing loops. To attach two Canoe Thwart Bags, feed the mounting straps first down one set of webbing loops, then up the webbing loops on the second bag and then around the thwart.
- 2) **Side of Canoe (for composite or Royalex boats):** Install the 1" Lightweight D-Rings to the inside of your hull using Vinyl Tec 2000 ([review adhesive instructions](#)). The anchors should be installed approximately 14" apart (centre to centre) with the anchor webbing running vertically. Take the mounting straps and run them between the anchor and the top-side d-rings on either side of the bag.
- 3) **Underneath Seat:** This works best with either wood webbed seats, or tractor style seats WITH holes. Feed the mounting straps through all three webbing loops on the top of the bag. With wood webbed seats, wrap the mounting straps around the width of the seat and then secure. With tractor seats, wrap the mounting straps around the front of the seat, through the drainage holes, and then secure. Option to better secure the bag by mounting the anchors on the floor of

the hull and feeding the waist straps through them.

- 4) **Waist Mount:** Attached to the underside of the bag, you will find a long waist strap for on-shore excursions (also works great for fly fishing). While mounted in the boat, the waist strap can be tucked into the body of the bag through the adjacent Velcro closure.

### **CARE INSTRUCTIONS**

Clean salt, sand, and grit after use with fresh water. Do not store the product in damp conditions. Inspect the product for damage both before and after use. Do not abuse or apply undue stress to the product. Do not expose the product to long hours of direct sunlight. Identify your name on the product in case of loss.
