

GERANIUMS OF CORDOBA OIL SERUM

Repair & Recovery

This hardworking yet gentle serum contains an array of exotic ingredients, including geranium and tamanu oils, to support skin renewal, repair and long-lasting hydration. It also provides lightweight yet effective protection against oxidative damage, by providing deeply penetrating vitamins, minerals and fatty acids.

ACTIVE INGREDIENTS:

Pelargonium (Geranium) Absolute Oil contains antioxidant properties that can help protect skin from environmental oxidative damage and promote a more youthful appearance. It also has antibacterial and antimicrobial properties, as well as the ability to promote skin regeneration and renewal.

Olea europaea (Olive) Squalane is a natural emollient that mimics the skin's sebum (natural oil), providing excellent hydration to soothe, smooth and soften skin. It also helps to enhance skin's elasticity, which is crucial to a more youthful appearance.

Organic Punica granatum (Pomegranate) Seed Oil helps to soften, soothe, nourish and heal skin, all while promoting the skin's natural processes for repair and rejuvenation. Pomegranate seed oil is also said to help diminish the appearance of fine lines and wrinkles.

Rosa canina (Rosehip) Oil contains a bevy of beneficial fatty acids, which provide deeply penetrating, long-lasting moisture and nourishment for the skin. Rosehip oil is also rich in vitamins A and C, which help repair, brighten and smooth skin, by encouraging cell turnover and providing antioxidant protection from skin-damaging free radicals. These nutrients and properties make rosehip oil a preferred ingredient for preventing age-related wrinkles.

Organic Madagascar Calophyllum inophyllum (Tamanu) Nut Oil has antioxidant, anti-inflammatory and antibacterial properties that help promote calmer, clearer skin. It has also been known to help reduce the appearance of scars, especially those caused by acne and blemishes.

Rubus Laciniatus (Blackberry) Seed Oil is a natural emollient (skin moisturizer) that contains several important skin-nourishing ingredients, such as vitamins A and E, essential fatty acids, all of which help to gently hydrate and soothe irritated or damaged skin while promoting the body's natural healing and repair processes. Unlike other oils, it is lightweight and non-greasy, making it perfect for all skin types.
