

RED RASPBERRY AND CROWBERRY

Pro Enzymes & AHA Peel

Formulated with professional-grade botanical ingredients to accelerate skin cell turnover, this at-home peel provides gentle exfoliating effects, penetrating moisture and protective properties to leave skin feeling fresher, brighter and smoother, with a more even tone and texture. It contains natural alpha hydroxy acids, vitamins, essential fatty acids and enzymes to nourish, soothe and prevent breakouts.

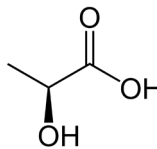

ACTIVE INGREDIENTS:

Empetrum nigrum (Crowberry) has a higher antioxidant content than many other berries, delivering nourishment to skin to help protect against free radical damage and environmental pollutants that contribute to fine lines, wrinkles and other signs of aging.

Rubus ideaus (Red Raspberry) is cold-pressed from red raspberry seeds and contains an array of skin-helping nutrients. Antioxidants and essential fatty acids work to soothe minor irritations, while vitamins A and E help to accelerate healthy skin cell turnover and regeneration, while stimulating skin's natural collagen production to improve texture and elasticity. Red raspberry also contains linoleic acid, to help balance skin's oil production and prevent breakouts.

Lactic Acid is a type of alpha hydroxy acid (AHA) derived from milk, which provides an exfoliating effect to brighten and smooth the skin's surface. It helps even skin tone, while also helping to diminish the appearance of dark spots, wrinkles and fine lines.

Cucurbita (Pumpkin) Enzyme contains naturally occurring alpha hydroxy acids (AHA) that accelerate skin cell turnover and regeneration, leaving behind fresher, radiant and more youthful skin. Pumpkin also contains skin nourishing and protecting vitamins, including vitamin A and C, both with powerful antioxidant properties.

Alvia rosmarinus (Rosemary) is especially helpful for oily skin, due to its natural anti-inflammatory and antimicrobial properties. It works overtime to help unclog pores, balance skin's tone to fade past acne scars and prevent future breakouts from occurring.

Olea europaea (Olive) Leaf Extract is a natural, gentle emollient that mimics skin's own sebum (natural oil), providing hydration to soothe, smooth and soften skin. It also provides antioxidant protection and helps to enhance skin's elasticity, which is crucial to a more youthful appearance.
