

Dehaz Nelson Gabi

ROSE GERANIUM AND PINK CLAY + AHA

Foaming Oil Cleanser

Enhanced with pink kaolin clay, fruit enzymes, amino acids and botanical oils, this richly purifying and hydrating foaming cleanser leaves skin cleaner, brighter and more balanced. In addition to cleansing and preventing future breakouts, it also provides nourishing vitamins and antioxidants, to further protect skin against environmental damage.

ACTIVE INGREDIENTS:

Apple Amino Acids, derived from apple fruit, help to keep skin hydrated and even. Amino acids are crucial for the structural integrity and continuous renewal of skin, as the building blocks of peptides and protein, and also contribute to collagen production.

Ricinus communis (Castor) Oil is a multi-purpose oil derived from the seed of the castor bean plant. It's a popular skincare ingredient because it's rich in natural fats, which help deliver moisture and nourishment to the skin. Castor oil is also said to have anti-inflammatory, anti-fungal and anti-microbial properties, making it an excellent addition to cleansing products.

Curcubita (Pumpkin) Enzyme contains naturally occurring alpha hydroxy acids (AHA) that accelerate skin cell turnover and regeneration, leaving behind fresher, radiant and more youthful skin. Pumpkin also contains skin nourishing and protecting vitamins, including vitamin A and C, both with powerful antioxidant properties.

Carica (Papaya) Enzyme, also known as papain, is found naturally in papaya fruit and offers natural exfoliating and brightening properties. Papain also promotes the skin's natural repairing processes, and helps protect skin against future oxidative damage.

Pink Kaolin Clay acts as a natural cleanser for the skin, gently drawing out impurities such as dirt, debris, toxins and dead skin cells, while absorbing excess oil, to leave skin feeling clean and pure. It also helps prevent blemishes and breakouts.
