

As a precaution, gloves and eye protection should be worn when handling drug substances and using test units. Do not puncture any part of unit. Do not remove probe once a capsule is broken. In the unlikely event of a spill, rinse affected area thoroughly with water. Keep out of reach of children. All results are presumptive. If necessary, further testing by a competent drug testing lab can provide additional identification.

Test Preparation

**1** Remove the Smart-Tip<sup>™</sup> probe from test unit.

**2** Sample suspected substance.  
**Brown Powder**

**3** Lock Smart-Tip<sup>™</sup> probe into test unit. Press firmly.

**STOP**  
Do not continue unless probe is locked below the Flex Pins and cannot be removed from the test unit.

Chamber 1 Identification

**4** With **thumb and forefinger**, squeeze chamber 1 until capsule breaks.

**5** Gently shake test unit for 2-3 seconds.

Chamber 1 Results

The appearance of a purple-red color within a few seconds strongly indicates the presence of **Brown Heroin**, if the substance is a brown powder.

If a purple-red color develops, Heroin is present, proceed to Disposal.  
If **no** purple-red color develops, Brown Heroin is **not** present. Proceed to Step 6.

Chamber 2 Identification

**6** With **thumb and forefinger**, squeeze chamber 2 until capsule breaks.

**7** Gently shake test unit for 2-3 seconds.

Chamber 2 Results

The appearance of a purple-red color within a few seconds indicates the presence of a basic alkaloid substance (possible drug).

If **no** purple-red color develops within one minute, Heroin is **not** present.

**Disposal**

The test kit is safe to dispose of in the trash.

### IMPORTANT INFORMATION

- IDenta Touch&Know<sup>™</sup> Discreet Drug Test Kits** are used to determine the presence of certain drugs in substances such as powders, crystals, granules, flakes, pills, tablets, or liquids.
- All results are presumptive.** If necessary, further testing by a competent drug testing lab can provide additional verification.
- A color change indicates a positive result for the listed drugs only if it occurs within the first minute.**

If there is **NO** color change within the time indicated, the listed drugs are **NOT** present in the tested sample. After a minute, the sampler and the liquid may begin changing color as a normal part of the testing process and this color change does **NOT** indicate a positive result.
