LIVER FLUSH™ SOLUTION

To Support Healthy Liver Function

Liver Flush provides a ten-day course to support a healthy liver function. Includes plant extracts milk thistle and dandelion together with other antioxidants.

What are the Benefits LIVER FLUSH™ Solution?

- A potent combination of natural ingredients to support the vital functions performed by the liver, including its key detoxifying function, as well as its roles in the digestion of fats, protein and carbohydrates, supporting the immune system and the synthesis and storage of key vitamins.
- **Contains Milk Thistle**, with its active compounds including silymarin, to support liver function and health, through antioxidant and immune supporting properties, as well as supporting the horse's own anti-inflammatory systems.

- Also contains important antioxidants **Dandelion, Chicory, Ginger, Artichoke and Turmeric**, to help mop up free radicals and support the health of liver cells.
- Provided in a palatable solution, easily mixed in feed, to be fed for a ten day course.
- **Low sugar** and suitable for horses and ponies requiring a low sugar diet.
- **BETA NOPS and UFAS** accredited ensuring our products are fully compliant with The Rules of Racing and the FEI guidelines for Clean Sport.
