

HELP! WHAT NUTRIENTS SHOULD I USE TO GROW FAT COLAS?

SELECT YOUR WATER TYPE

REVERSE OSMOSIS (RO) WATER

YUP THAT'S WHAT I'M WORKING WITH

DO YOU WANT A 1 BAG OR 2 BAG BASE FORMULA SYSTEM?

1 BAG

yup

**JACK'S 12-4-16
FORMULA**

When you are starting with water that is very pure, one key to remember is that it's up to YOU to add back all the good nutrients that your crop needs to survive. Formula designers at JR Peters ensured BOTH of these programs will provide elevated levels of highly soluble calcium and magnesium, plus an enhanced NPK and micronutrient package to help replace the nutrients that are missing from pure water and RO filter water types.

WHAT IS THE DIFFERENCE?

2 BAGS

yup

**JACK'S 321
PROGRAM**

CITY, MUNICIPAL, OR WELL WATER

YUP THAT'S WHAT I'M WORKING WITH

GREAT! HAVE YOU EVER HAD YOUR WATER TESTED?

shit I need that

yup have it

TAKE A LOOK AT OUR SOURCE WATER PARAMETERS .
[RIGHT HERE!](#)

took a look

SOURCE WATER CONTAINS LESS THAN 50 PPM CALCIUM

nope not mine

you bet it does

HEAD UP TO THE 1 BAG OR 2 BAG OPTION

SEND WATER ANALYSIS TO

This way we can see exactly what is in your water (EC,pH, Alkalinity, and all the essential elements) this will help take the "guessing part" out of the equation and get you dialed in with Jack's!

JACK'S 15-5-20

The 15-5-20 Formula, was designed for tough source water that grew up on the wrong side of the tracks. If you have 50 ppm Ca or more, 0.5 EC >, and high alkalinity in your source water. Then the 15-5-20 is the way to go!
