

Do I Need a Building Permit?

- Only your local building department can tell you for sure
 - This is normally an agency within the city or county government
 - Call them and let them know the size and type of structure you are planning on building

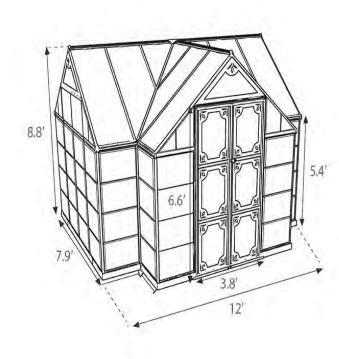

Hobby Style Greenhouses

- Smaller hobby style greenhouses (under 120 square feet) typically do not require building permits
 - If a permit is required you also might have to provide a certified engineering drawing to the building officials before you can obtain one
 - If required, we can supply, for an additional charge, certified engineering prints and calculations for most of our greenhouses.

NOTE: It is important that this be done prior to ordering the structure

You alone are responsible to make sure that you are building in accordance with your local codes.

*Palram Garden Chalet Greenhouse (as shown above) is roughly 96 square feet
