

Thermo-King

The Thermo-King is made of the quality material Thermolen®.

Lid adjustment with Wind-Fix

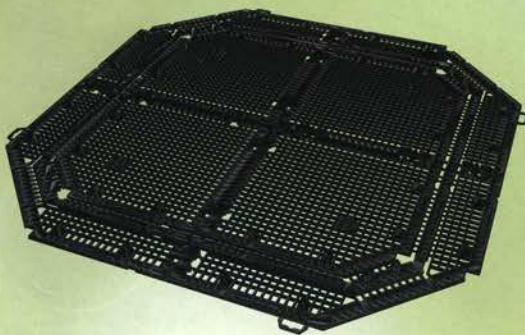

Easy filling through two large flaps

Excellent composting results: the clamp lid enables the discharge of humid air and consequently produces ideal thermo conditions inside the composter. Summer and winter position of the lid is possible.

Easy and convenient withdrawal of compost through two large flaps.

Easy-lock-System - Assembly without tools

Fast composting by louvres in the lateral and bottom part

Thermo-King Soil Fence

The soil fence enables access for the micro-organisms to your composter and protects from rodents. The soil fence is available for all Thermo-King composters (400, 600 and 900 L).

The assembly is very easy: the different fence parts are simply fit into each other – ready!

Meet the
highest demands
